1. Summary of Industry

The fast-moving consumer goods (FMCG) sector is India’s fourth-largest sector and has been expanding at a healthy rate over the years as a result of rising disposable income, a rising youth population, and rising brand awareness among consumers. With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India’s GDP. India is a country that no FMCG player can afford to ignore due to its middle-class population which is larger than the total population of the USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the general public. More crucially, with a median age of just 27, India’s population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

Growing awareness, easier access, and changing lifestyles have been the key growth drivers for the sector. The urban segment (which accounts for a revenue share of around 55%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

INTERNAL RISK FACTOR

BUSINESS RELATED RISKS

- 1. We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business and our manufacturing facility, and any delay or inability in obtaining, renewing or maintaining such permits, licenses and approvals could result in an adverse effect on our results of operations.***

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous.

Additionally, we have applied and are in the process of applying for certain approvals, licenses, registrations and permits, which are necessary for us to continue our business and need to be updated pursuant to conversion from private to public Company. For instance, our Company has applied for: registration of manufacturers/ packers/ importers under Rule 27 of the Legal Metrology (Packaged Commodities) Rules, 2011; for grant of License to manufacture, weights, measures, weighing or measuring instrument under the Legal Metrology Act, 2009; and for Registration Certificate of Shops and Establishment Certificate under the Punjab Shop and Commercial Establishment Act, 1958 for two of our Company Outlets. Further, our Company based on legal opinion, have formed a view that certain intimation/ licenses / approvals are not required. However, in case, the regulatory authorities deem that our Company ought to have obtained such approvals, our Company may have to obtain such licences/approvals and may also be subject to certain penalties or fines, if any.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations. For further details regarding the material approvals, licenses, registrations and permits, which are, pending receipt or renewal, see "**Government and Other Statutory Approvals**" on page 173.

- 2. We do not manufacture some of our products such Pulses, Rice, Raw or Sabut Spices, Grains and Millets and Sugar and jaggery etc in our own capacity but procure the same from third party suppliers.***

Our Company does not have its own manufacturing facility for some of our products as Pulses, Rice, Raw or Sabut Spices, Grains and Millets and Sugar and Jaggery etc. and the same is procured from third party suppliers. Any decline in the quality of such products or delay in delivery of such products by such third parties, or rise in their costs or charges may adversely affect our operations. Further there can be no assurance that such parties shall continue business with us or would cater to demands of our competitors. We do not have any long term arrangements with such suppliers and if such suppliers terminate their business or supply similar products to our competitors at better rates, our result of operations and future prospects may be adversely affected. Further we are also indirectly exposed to the risks at the third party manufacturers' faces and hence any interruptions in the manufacturing operations at their end on account of natural disasters, labour problems, machinery breakdowns, etc. may adversely affect our supply chain and profit margins.

- 3. We operate in highly competitive markets, and the scale and resources of some of our competitors may allow them to compete more effectively than we can, which could result in a loss of our market share and a decrease in our net revenues and profitability***

Our industry is highly fragmented as there is competition from various organized and unorganized players. There are some of the organized players like: Gandhi Spices Private Limited (Hathi Masala), Adani Food Products Private Limited, Ramdev Food Private Limited, MDH Masala Private Limited, Baadshah Masala Private Limited, Everest Masala Private Limited. In the listed space we face competition from NHC Food Limited. Other than the organized players we also face competition from unorganized local suppliers. The growth trajectory in the industry has encouraged new entrants to enter into this industry with new business models. In such highly competitive environment, to gain more market share the players are likely to reduce the pricing which is a challenge for the existing players. We face intense competition from other retailers that market products similar to ours. We compete in various aspects, including brand recognition, value for money, product quality and pricing, supply chain management etc. Intensified competition may result in pricing pressures and reduced profitability and may impede our ability to achieve sustainable growth in our revenues or cause us to lose market share.

Our competitors may also engage in aggressive and negative marketing or public relations strategies which may harm our reputation and increase our marketing expenses. Any of these events could substantially harm our results of operations. Some of our existing and potential competitors enjoy substantial competitive advantages, including: longer operating history, the capability to leverage their sales efforts and marketing expenditures across a broader portfolio of products, more established relationships with a larger number of suppliers, contract manufacturers and channel partners, access to larger and broader customer base, greater brand recognition, greater financial, marketing, distribution and other resources and larger intellectual property portfolios. We cannot assure you that we will compete with them successfully.

4. *Our Company has applied for registration of the trademarks in its name. Until such registration is granted, we may not be able to prevent unauthorised use of such trademarks by third parties, which may lead to the dilution of our goodwill*

Our Company has made several applications under various classes for registration of our logo under the Trade Mark Act, 1999 which are pending as on date. However, some of the applications bearing numbers 6151521, 6151523 and 6151522 under classes 29 and 30 respectively for registration of our logo “” and “” under the Trade Mark Act, 1999 are objected as on date. There can be no assurance that we will be able to get these objections removed and the respective trademark applications registered.

Pending the registration of these trademarks, any other vendor in the similar line of business as ours may use the above-mentioned trademarks and we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. Further, our applications for the registration of certain trademarks may be opposed by third parties, and we may have to incur significant cost in relation to these oppositions. In the event we are not able to obtain registrations due to opposition by third parties or if any injunctive or other adverse order is issued against us in respect of any of our trademarks for which we have applied for registration, we may not be able to use such trademarks and / or avail the legal protection or prevent unauthorized use of such trademarks by third parties, which may adversely affect our goodwill and business. For further details see “*Our Business - Intellectual Property*” and “*Government and Other Statutory Approvals*” on pages 93 and 173, respectively.

5. *Any non-compliance or delays in GST Return Filings, TDS EPF Payments may expose us to penalties from the regulators.*

As a Company, we are required to file GST returns and make payments in respect of Employee Provident Fund with the respectively authorities. However, there are certain inadvertent delays in relation to filling of GST returns and EPF payments in the past for which the Company have paid the penalties and taken the steps to improve the internal system for payment of GST to mitigate the technical difficulties and the Company has appointed an external consultant to ensure timely payment of towards EPF.

instances of noncompliance or delay in payment of statutory dues or fillings:

Period	Nature of Statutory Due	Type of Default	Amount (Rs.)
2020-21	ESI Deposit)	Late Deposit of ESI	19,160/-
2020-21	TDS	Interest on Late deposit of TDS	7,821/-
2021-22	TDS	Interest on Late deposit of TDS	29,000/-

2022-23	ESI	Late Deposit of ESI	6,922/-
2022-23	TDS	Interest on Late deposit of TDS	70,874/-
Apr 1 – Dec 31, 2023	ESI	Late Deposit of ESI	28,660/-
Apr 1 – Dec 31, 2023	PF	Late Deposit of PF	1,99,808
Apr 1 – Dec 31, 2023	TDS	Interest on Late deposit of TDS	70,911/-

However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our GST filing or EPF payment in future, which may adversely affect our business, financial condition, and reputation.

6. *We do not have long term agreements with suppliers for our raw materials and an increase in the cost of or a shortfall in the availability of such raw materials could have an adverse effect on our business, results of operations and financial condition.*

Production quantity and cost of our products are dependent on our ability to source raw materials and packaging materials at acceptable prices, and maintain a stable and sufficient supply of our major raw materials. Our key raw materials include pulses, spices like chillies, coriander powder and other raw materials. We source our raw materials from across the country to ensure that the products we manufacture have an authentic taste without artificially disturbing the natural taste of the spices or other food products. For instance, for our chilli powder we source our chillies from the farms of from Gadodia Market Kharibaoli and Sharbati Wheat and Madhya Pradesh lok one wheat sourced from Ashok Nagar and ganjbasoda in Madhya Pradesh and mustard seed for Mustard oil Sourced from Jodhpur Rajasthan and New anaj mandi Najafgarh in new Delhi Therefore, each of our products is made from the finest natural produce which caters to the genuine taste and an assurance of authenticity. There can be no assurance that we will be able to procure all of our future raw material requirements at commercially viable prices. Furthermore, in the event that such suppliers discontinue their supply to us or if we are unable to source quality raw material from other suppliers at competitive prices, we may not be able to meet our production and sales targets. Interruption of, or a shortage in the supply of, raw material may result in our inability to operate our production facilities at optimal capacities or at all, leading to a decline in production and sales. An inability to procure sufficient quality raw material at reasonable cost, or an inability to pass on any additional cost incurred on purchase of raw materials to our customers, may adversely affect our operations and financial conditions.

7. *We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.*

Our Company is engaged in the business of manufacturing of flour (chakki atta), herbs & spices, unpolished pulses, grains, and yellow mustard oil significantly on the basis of orders which are received from our franchise units . We have not entered into any formal agreements, arrangement or any other understanding with our franchise regarding the minimum purchase order and therefore, our business is dependent upon the continuous relationship with the franchise units and the quality of products supplied to us. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing the products supplied to us. If there occurs any change in the market conditions, market trends, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers’ demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

8. *The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, or any real or perceived contamination in our products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.*

All the products that we manufacture are for human consumption and are subject to risks such as contamination, adulteration, and product tampering during their manufacture, transport or storage. Our raw materials and our products are required to be stored, handled, and transported at specific temperatures and under certain food safety conditions. Any

shortcoming in the production or storage of our products due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable regulatory standards. Any allegation that our products contain contaminants could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis.

The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, or any real or perceived contamination in our products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.

9. *Our business is dependent on our processing units for few products. The loss of or shutdown of operations of our processing units may have a material adverse effect on our business, financial condition and results of operations.*

Our flour (chakki atta), herbs & spices, processing unit is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, lock-outs, earthquakes and other natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. We carry out planned shutdowns for maintenance. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition and results of operations may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

10. *Our operations are considerably located in Delhi -NCR and failure to expand our operations may restrict our growth and adversely affect our business.*

Currently, we are carrying our business mainly in Delhi -NCR and hence our major revenues are generated from operations in these regions only. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus, we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues, our operating results and financial conditions.

11. *Our continued operations are critical to our business and any shutdown of our manufacturing units may adversely affect our business, results of operations and financial condition.*

Our manufacturing units are located in Gurugram, Haryana. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our current manufacturing units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our manufacturing units for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiralling cost of living around our units may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness. For instance, due to the ongoing pandemic and the lockdown imposed by the Central Government and various state governments, we may be required to shut down our manufacturing units which may cause an adverse impact on our business operations, revenue, results of operations and financial conditions.

In addition to the above if our manufacturing units suffer losses as a result of any industrial accident, we may be forced to shut down our manufacturing units which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing units may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing units, which may hinder

our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

- 12. *Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.***

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal quality standards. However, we cannot assure you that our quality control processes or our product will pass the quality tests and inspections conducted by various agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the regulatory quality standards set by regulatory agencies and our customers as deviation from the same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

- 13. *Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business prospects and results of operations.***

Regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our manufacturing and/or distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing and marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

- 14. *Our inability to expand or effectively manage our sales and marketing network may have an adverse effect on our business, results of operations and financial condition.***

The efficiency of the marketing and sales network is critical to the success of our Company. Our success lies in the strength of our relationship with our customers who have been associated with our Company. Our Company has a unique business model, wherein we market and sell our products directly to our customers, without involving any major intermediaries, which helps us provide complete revenue share to the farmers and provide cost competitive and affordable products to our customers. We manufacture unadulterated products and do not add any preservatives in our products. We sustain our products by manufacturing and packaging products in quantities which are proportionate to the shelf life of our product, in order to avoid wastage and deliver a wide range of products which carry the freshness and goodness of each ingredient.

Our business has two model first is Business to customer (“B2C”) in nature, where we have company-owned stores and franchisee-run stores. Also we work on Omni-channel Approach where in our products available to our customers through distribution networks across both online and offline touch points. We strategically leverage our presence on online channel (both B2C platform which is our in-house built Mobile Application and Website and Retail Outlets). We do not have a distribution or a third-party marketing network, therefore we are highly dependent upon our internal sales and marketing teams.

We continuously seek to increase the penetration of our products with the continuous efforts of our sales and marketing teams by targeting different customer groups. We cannot assure you that we will be able to successfully deploy the efforts of our sales and marketing teams or effectively manage our existing network. If the terms offered to our sales and marketing executives by our competitors are more favourable than those offered by us, our sales and marketing executives may decline to distribute our products and terminate their arrangements with us. We may be unable to appoint replacement of our sales and marketing executives in a timely fashion, or at all, which may reduce our sales volumes and adversely affect our business, results of operations and financial condition.

15. Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company’s results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers’ payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

16. Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

- 17. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.***

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

- 18. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.***

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the

advancement of research and development in the food and spices industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

19. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating and investing activities in the past, the details of which are provided below:

(₹ in lacs)

Particulars	For the period ended December 31, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Net Cash Flow from/(used in) Operating Activities	(43.01)	(20.52)	2.21	(26.00)
Net cash generated from/(used in) investing activities	(33.51)	(24.22)	(7.49)	(21.88)
Net Cash Flow from/(used in) Financing Activities	71.94	18.35	8.79	67.69

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

20. Our Company has availed certain unsecured loans which may be recalled at any time.

Our Company has availed certain unsecured loans of which an amount of ₹ 110.70 lakhs is outstanding for the nine months period ended December 31, 2023, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “**Financial Indebtedness**” on page 154 of this Draft Prospectus.

21. *Our inability to manage inventory in an effective manner could affect our business.*

Our business model requires us to maintain a certain level of inventory to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

22. *We have significant power requirements for continuous running of our manufacturing unit. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

Our manufacturing units significant electricity requirements and any interruption in the supply of power may temporarily disrupt our operations. Since, we have a high power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing units and thereby cause an increase in the production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled “***Our Business***” on page 93 of this Draft Prospectus.

23. *We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The food and spices industry in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the prices and products offered by our competitors. We may have to compete with new players in India and abroad who enter the market and are able to offer competing products. Our competitors may have access to greater financial, manufacturing, research and development, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the products prices and payment terms offered by them. In addition, our customers may enter into contract manufacturing arrangements with third parties, for products that they are presently purchasing from us. Our failure to successfully face existing and future competitors may have an adverse impact on our business, growth and development.

Further, some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market. Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see “***Industry Overview***” on page 84 of this Draft Prospectus.

24. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoter and Other Interests and Disclosures*” in the chapter titled — “*Our Promoter and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 133, 146, 154 *Error! Bookmark not defined.* and 152, respectively of this Draft Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

25. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold 99.98 % of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company’s best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

26. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.*

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a fixed price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “*Capital Structure*” on page 59 of this Draft Prospectus.

27. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

28. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2023, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “**Restated Financial Information**” at page 152.

While we believe that all our related party transactions have been conducted on an arm’s length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

29. Our Promoter has extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.

Our Promoter has extended certain personal guarantees in favour of certain banks / financial institutions with respect to various facilities availed by our Company from them. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled “**Financial Indebtedness**” on page 154 of this Draft Prospectus.

30. Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “**Financial Indebtedness**” on page 154 of this Draft Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

31. *Stringent food safety, consumer goods, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.*

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. We may also be subject to additional regulatory requirements due to changes in governmental policies. Further, we may also incur additional costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These laws and regulations are increasingly becoming stringent and may in the future create substantial compliance or remediation liabilities and costs. These laws may impose liability for non-compliance, regardless of fault. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we intend to comply with applicable regulatory requirements, it is possible that such compliance may prove restrictive, costly and onerous and an inability to comply with such regulatory requirement may attract penalty. For details see, “**Government and Other Approvals**” beginning on page 173.

32. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

For the Financial Year ended on March 31, 2023 our Company’s total outstanding secured loans are ₹ 150.43 lacs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “**Financial Indebtedness**” on page 154 of this Draft Prospectus.

33. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “**Objects of the Issue**” beginning on page 71 of this Draft Prospectus.

34. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and

retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — **“Our Management”** on page 133 of this Draft Prospectus.

We believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, product defects, consumer complaints, or negative publicity or media reports involving us, or any of our products could harm our brand and reputation and may dilute the impact of our branding

and marketing initiatives and adversely affect our business and prospects. In addition, adverse publicity about any regulatory or legal action against us could damage our reputation and brand image, undermine our consumers' confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or immaterial to our operations.

41. *The requirement of funds in relation to the objects of the Issue has not been appraised.*

We intend to use the proceeds of the Issue for the purposes described in the section titled "**Objects of the Issue**" on page 71. The objects of the Issue have not been appraised by any bank or financial institution. These are based on management estimates and current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

42. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control*

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or other independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be subject to change based on various factors which are beyond our control. 43. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we maintain insurance cover for insuring our plant and machinery situated at our manufacturing units against loss or damage by fire, earthquake, terrorism, spoilage, impact damage due to road or rail services, *etc.* There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or

adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

44. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 151 **Error! Bookmark not defined.** of this Draft Prospectus.

45. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

46. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

As the issue size shall be less than ₹10,000 lacs, under Regulation 262 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 71 of this Draft Prospectus.

47. *We have not independently verified certain data in this Draft Prospectus.*

We have not independently verified data from the Industry and related data contained in this Draft Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

48. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

49. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

50. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National*

Stock Exchange of India Limited in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the

issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 51. There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.***

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

- 52. The price of the Equity Shares may be highly volatile after the Issue.***

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

- 53. You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.***

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

- 54. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform

our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

55. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the real estate sector;
- adverse media reports about us or the Indian real estate sector;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

56. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional

Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

57. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

58. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

59. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 ("**Finance Act**"). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 ("**PDP Bill**") was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India ("**MoEIT**") has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

60. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the x` of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

61. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

62. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

63. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

64. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

65. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Justification for “Holding Period” levels

The justifications for the holding levels mentioned in the table above are provided below:

Current Assets	
Inventories	The historical holding days of inventories has been in the range of 46 to 78 days in the last three financial years and 101 days for the period ended December 31, 2023. Our Company estimates inventory holding days at around 84 days in FY 2023-24 and around 89 days in FY 2024-25. This seems to be reasonable in view of the lead time of procurement of raw materials, process cycle time and lifting time taken by the customers. Also, it seems to be reasonable considering the nature and volume of business activity of the Company.
Trade receivables	The historical holding days of Trade Receivables has been in the range of 6 to 28 days in the last three financial years and 40 days for the period ended December 31, 2023, with average Trade Receivables days of 16 days in the last three financial years. As per the current credit terms of the Company and prevalent trend in the business of the Company, the holding level for receivables anticipated at 32 days of total gross sales during FY 2023-24 and 35 days of total gross sales during FY 2024-25.
Current Liabilities	
Trade Payables	The historical holding days of Trade Payables has been in the range of 21 to 33 days in the last three financial years, with average Trade Payables days of 26 days in the last three financial years and 40 days for the period ended December 31, 2023. As per the current credit terms of the Company and prevalent trend in the business of the Company, the holding level for payables anticipated at 31 days of total gross sales during FY 2023-24 and 36 days of total purchases and related expenses during FY 2024-25.

Our Company proposes to utilize upto 350 lakhs of the Net Proceeds in Fiscal 2025 towards our working capital requirements. The balance portion of our working capital requirement for the Fiscal 2025 will be arranged from borrowings and internal accruals/net worth.

Rationale for the Increase in working capital requirement for 31stMarch, 2024 compared to 31st March, 2023

Our company engaged in the manufacturing of flour (*chakki atta*), herbs & spices, unpolished pulses, grains, and yellow mustard oil in our product range and markets & sell it in and around Delhi-NCR under the brand name “**HARIOM**”. The nature of our business involves procuring raw materials from various parts of the country and process our products with utmost care without using artificial preservatives or chemicals, thereby creating a product portfolio of organic spices and flour, which carry the freshness and goodness of each ingredient. Further, our business model and product portfolio is covered under page 93.

Our need for incremental working capital is briefly explained below:

Projected Revenue Growth:

The estimated revenue growth from Rs. 1,208.56 lakhs approx. in FY 2023 to the projected figures for FY 2025 at Rs.1,950.22 lakhs approx. indicating a growth of 27.03% a need for higher working capital to handle the associated operational requirements and support business expansion.

Seasonal Fluctuations and Crop Variability:

The nature of our business is influenced by seasonal fluctuations and crop variability, particularly in the case of wheat and spices. These factors can impact the availability and cost of raw materials, necessitating a higher working capital to manage procurement during periods of price volatility and to ensure uninterrupted production.

Expanding Retail Presence:

Our company has strategically expanded its retail presence, both through company-owned outlets and franchise partnerships. The growth in the number of retail points in the future increases the demand for inventory, working capital, and logistical support to maintain optimal stock levels and meet customer expectations efficiently.

Composite Supply Chain:

We procure raw materials and ingredients, in addition to bearing operational expenses related to manufacturing and distribution. The full realization of revenue is often tied to the sale of finished goods, requiring a higher working capital to cover costs until the final sale and payment.

Quality Assurance and Compliance:

As a food processing company, ensuring quality standards and compliance with regulatory requirements is paramount. This commitment to quality may involve additional costs for testing, certification, and adherence to health and safety standards, contributing to an increased working capital requirement.

In summary, the complexity of our business model, combined with the need to manage seasonality, expand retail operations, support franchisees, and maintain stringent quality standards, necessitates a higher working capital for the financial year 2023-24 and 2024-25. This increased capital will enable us to tap into the current growth potential in the market, sustain efficient operations, timely procurement of raw materials, and uphold the quality and standards expected by our customers and partners.

2) General corporate purposes

The Net Proceeds will be first utilized towards the Objects as mentioned above. The balance is proposed to be utilized for General corporate purposes, subject to such utilization not exceeding 25% of the Gross Proceeds, in compliance with the SEBI ICDR Regulations. Our Company intends to deploy the balance Net Proceeds, if any, for general corporate purposes, subject to above mentioned limit, as may be approved by our management, including but not restricted to, the following:

- a) strategic initiatives, partnerships, joint ventures and acquisitions;
- b) brand building and strengthening of promotional & marketing activities; and
- c) On-going general corporate exigencies or any other purposes as approved by the Board subject to compliance with the necessary regulatory provisions.

The quantum of utilization of funds towards each of the above purposes will be determined by our Board of Directors based on the permissible amount actually available under the head “Utilization of Net proceeds” and the business requirements of our Company, from time to time. We, in accordance with the policies of our Board, will have flexibility in utilizing the Net Proceeds for general corporate purposes, as mentioned above.

SECTION V – ABOUT THE COMPANY
INDUSTRY OVERVIEW

GLOBAL ECONOMIC OUTLOOK

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than-expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.

With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and then assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.

INDIA MACROECONOMIC TRENDS & OUTLOOK

GDP and GDP Growth

The real GDP in Q1 of 2023-24 registered a YoY growth of 7.8% over the previous year. Sequentially, the real GDP in Q1 of 2023-24 registered a growth of 7.8% as compared to 13.1% in Q1 of 2022-23, indicating the sustenance of growth momentum

in the financial year. These estimates reaffirm the ability of the Indian economy to grow on the strength of its domestic demand even as a rise in global uncertainties slow global output. India's real GDP expanded by 7.2% in FY23, the highest among major economies.

The country has transitioned to a modern economy, wherein it has become more globally integrated and exports a fifth of its output, compared to one-sixteenth at the time of independence. India also benefits from the demographic transition with the help of a lower infant mortality rate and a steady increase in the literacy rate. Therefore, with more equitable income distribution, better employment levels, and globally comparable social amenity provision, India's per capita GDP may expand in the next 25 years as it did in the previous 75 years.

The outlay for capital expenditure in 2023-24 (BE) increased sharply by 37.4% from Rs. 7.28 lakh crore (US\$ 89 billion) in the previous year (2022-23) to Rs. 10 lakh crore (US\$ 120 billion). The resilient growth of the Indian economy in the first half of FY23 has been the fastest among major economies, thereby strengthening macroeconomic stability.

Recently in 2023-24, the following key frequency indicators highlighted improved performances:

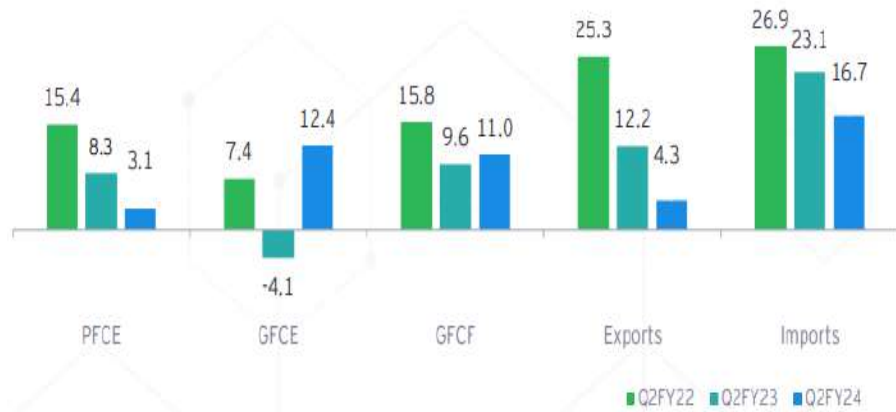

- Private consumption stood at 57.3% of the nominal GDP in Q1 of FY24 and 60.6% in FY23, supported by a rebound in contact-intensive services such as trade, hotel, and transport.
- The growth in the agriculture sector continues to remain buoyant, with healthy progress in Rabi sowing, with the area sown increased by 3.25% from 697.98 lakh hectares in 2021-22 to 720.68 lakh hectares in 2022-23. To further boost production and support farmers' income, higher Minimum Support Prices (MSPs) have been announced for the upcoming Rabi Marketing Season (RMS 2023-24) in the range of 2.0 to 9.1%.
- CPI inflation decreased in October 2023 to 4.87% from 5.02% in September 2023, with a decrease in food inflation.
- PMI Services witnessed an uptick and expanded to 55.5 in October 2023.
- The consumption of petroleum products during April-October 2023 was with a volume of 1,335.54 MMT.
- India's Index of Industrial Production (IIP) for September 2023 stood at 141.6 against 145.1 for August 2023.
- In FY24, the combined index of eight core industries stood at 154.1 during April-September 2023.

India's economy grew faster during the first half of FY23 than other economies, driven by strong demand and investment. Inflationary pressures have been moderating since October, with CPI inflation tempering to an eleven-month low in November. On top of that, it has fallen below the RBI's upper target band for the first time in 2022, mainly driven by the decline in food inflation. Furthermore, inflation expectations have also moderated in the November round of the RBI's Households' Inflation Expectations Survey. This bodes well for augmenting consumption in rural and urban regions in the upcoming months. Improvement in business and consumer sentiment is also likely to bolster discretionary spending. The real investment rate during Q2 of FY23 prevailing at a high level of 34.6% demonstrates the Government's continued commitment towards asset creation.

FISCAL DEVELOPMENTS IN INDIA

The Union Government finances have shown a resilient performance during the year FY23, facilitated by the recovery in economic activity, buoyancy in revenues from direct taxes and GST, and realistic assumptions in the Budget. The Gross Tax Revenue registered a YoY growth of 15.5% from April to November 2022, driven by robust growth in the direct taxes and Goods and Services Tax (GST).

Growth in direct taxes during the first eight months of the year was much higher than their corresponding longer-term averages. GST has stabilized as a vital revenue source for central and state governments, with the gross GST collections increasing at 24.8% on YoY basis from April to December 2022. Union Government's emphasis on capital expenditure (Capex) has continued despite higher revenue expenditure requirements during the year. The Centre's Capex has steadily increased from a long-term average of 1.7% of GDP (FY09 to FY20) to 2.5% of GDP in FY22 PA.

The Centre has also incentivized the State Governments through interest-free loans and enhanced borrowing ceilings to prioritize their spending on Capex. With an emphasis on infrastructure-intensive sectors like roads and highways, railways, and housing and urban affairs, the increase in Capex has large-scale positive implications for medium-term growth. The Government's Capex-led growth strategy will enable India to keep the growth-interest rate differential positive, leading to a sustainable debt to GDP in the medium run.

MONETARY MANAGEMENT & FINANCIAL INTERMEDIATION: A GOOD YEAR

- The RBI initiated its monetary tightening cycle in April 2022 and has since raised the repo rate by 225 bps, leading to moderation of surplus liquidity conditions.
- Cleaner balance sheets led to enhanced lending by financial institutions.
- The growth in credit offtake is expected to sustain, and combined with a pick-up in private capex, will usher in a virtuous investment cycle.
- Non-food credit offtake by scheduled Commercial Banks (SCBs) has been growing in double digits since April 2022.
- Credit disbursed by Non-Banking Financial Companies (NBFCs) has also been on the rise.
- The Gross Non-Performing Assets (GNPA) ratio of SCBs has fallen to a seven-year low of 5.0.
- The Capital-to-Risk Weighted Assets Ratio (CRAR) remains healthy at 16.0.
- The recovery rate for the SCBs through Insolvency and Bankruptcy (IBC) was highest in FY22 compared to other channels

CLIMATE CHANGE & ENVIRONMENTAL PROTECTION STEPS TAKEN BY INDIA

- India declared the Net Zero Pledge to achieve net zero emissions goal by 2070.
- India achieved its target of 40% installed electric capacity from non-fossil fuels ahead of 2030.
- The likely installed capacity from non-fossil fuels to be more than 500 GW by 2030 resulting in decline of average emission rate by around 29% by 2029-30, compared to 2014-15.
- India to reduce emissions intensity of its GDP by 45% by 2030 from 2005 levels.
- About 50% cumulative electric power installed capacity to come from non-fossil fuel-based energy resources by 2030.
- A mass movement LIFE– Life style for Environment launched.
- Sovereign Green Bond Framework (SGrBs) issued in November 2022.
- RBI auctions two tranches of Rs. 4,000 crore (US\$ 488.7 million) Sovereign Green Bonds (SGrB).
- National Green Hydrogen Mission to enable India to be energy independent by 2047.
- Green hydrogen production capacity of at least 5 MMT (Million Metric Tonne) per annum to be developed by 2030. Cumulative reduction in fossil fuel imports over Rs. 1 lakh crore (US\$ 12.2 billion) and creation of over 6 lakh jobs by 2030 under the National green Hydrogen Mission. Renewable energy capacity addition of about 125 GW and abatement of nearly 50 MMT of annual GHG emissions by 2030.
- The Survey highlights the progress on eight missions under the NAP on CC to address climate concerns and promote sustainable development.
- Solar power capacity installed, a key metric under the National Solar Mission stood at 61.6 GW as of October 2022.
- India becoming a favored destination for renewables; investments in 7 years stand at US\$ 78.1 billion.
- 62.8 lakh individual household toilets and 6.2 lakh community and public toilets constructed (August 2022) under the National Mission on Sustainable Habitat.

Key Macroeconomic Growth Drivers

India is on track to become the world's third largest economy by 2027, surpassing Japan and Germany, and have the third largest stock market by 2030, thanks to global trends and key investments the country has made in technology and energy. These are the following factors: -

Transformation of India's job market through Tier-2 & Tier-3 cities

India's job landscape is shifting from Tier-1 cities to Tier-2 and Tier-3 cities, which are now becoming significant talent hubs. The rise of remote work, better skill development prospects in Tier-II cities, and the expansion of various industries to these areas are driving recruiter's interest. Sectors like telecom, consumer electronics, retail, and banking are broadening job prospects for tech professionals outside major cities. This expansion is fueled by the rapid 5G roll-out and enterprises prioritizing digitalizing of operations.

Manufacturing Boost

Government of India has undertaken various steps to promote manufacturing sector and to boost domestic and foreign investments in India. These include introduction of Goods and Service Tax, reduction in corporate tax, interventions to improve ease of doing business, FDI policy reforms, measures for reduction in compliance burden, policy measures to boost domestic manufacturing through public procurement orders, Phased Manufacturing Programme (PMP).

Generating Productive Jobs

Capitalizing on a skilled workforce will require India to increase women's workforce participation and generate more productive jobs. SMEs employ around 40 per cent of India's workers.⁸ They make up a disproportionate share of India's economy and remain relatively inefficient, low skilled and rural-based. SMEs account for more than 80 per cent of industrial firms compared to 65 per cent in Indonesia and 25 per cent in China. However, across all sectors, India's smallest firms are

only 25 to 65 per cent as productive as their peers across Asia. Firms that employ more than 200 people in India tend to be as productive as comparable firms across Asia. The preponderance of SMEs is a factor holding back India's productivity. (Source: <https://www.dfat.gov.au/publications/trade-and-investment/india-economic-strategy/ies/chapter-1.html>)

Urbanization

Urbanization is driving a shift in India's workforce from lower productivity (agriculture) to higher productivity sectors (services and industry). Since 1950, the proportion of Indians living in urban areas has almost doubled, reaching 33 per cent in 2015. However, India's urbanisation rate remains low compared to other emerging economies (Figure 8). The United Nations projects that India's urbanization rate will rise to 42 per cent by 2035, lifting the urban population from 64 million in 1950 to 640 million.

(Source: <https://www.dfat.gov.au/publications/trade-and-investment/india-economic-strategy/ies/chapter-1.html>)

INDIAN FMCG INDUSTRY

The fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years as a result of rising disposable income, a rising youth population, and rising brand awareness among consumers. With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP. India is a country that no FMCG player can afford to ignore due to its middle-class population which is larger than the total population of the USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the general public. More crucially, with a median age of just 27, India's population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

Growing awareness, easier access, and changing lifestyles have been the key growth drivers for the sector. The urban segment (which accounts for a revenue share of around 55%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

FMCG giants such as Johnson & Johnson, Himalaya, Hindustan Unilever, ITC, Lakmé, and other companies (that have dominated the Indian market for decades) are now competing with D2C-focused start-ups such as Mamaearth, The Moms Co., Bey Bee, Azah, Nua and Pee Safe. Market giants such as Revlon and Lotus took ~20 years to reach the Rs. 100 crore (US\$ 13.4 million) revenue mark, while new-age D2C brands such as Mamaearth and Sugar took four and eight years, respectively, to achieve that milestone.

Rural consumption has increased, led by a combination of increasing income and higher aspiration levels. There is an increased demand for branded products in rural India. On the other hand, with the share of the unorganized market in the FMCG sector falling, the organized sector growth is expected to rise with an increased level of brand consciousness, augmented by the growth in modern retail. Another major factor propelling the demand for food services in India is the growing youth population, primarily in urban regions. India has a large base of young consumers who form the majority of the workforce, and due to time constraints, barely get time for cooking. Online portals are expected to play a key role for companies trying to enter the hinterlands. The Internet has contributed in a big way, facilitating a cheaper and more convenient mode to increase a company's reach. The number of internet users in India is likely to reach 1 billion by 2025. It is estimated that 40% of all FMCG consumption in India will be made online by 2020. E-commerce share of total FMCG sales is expected to increase by 11% by 2030. It is estimated that India will gain US\$ 15 billion a year by implementing GST. GST and demonetization are expected to drive demand, both in the rural and urban areas and economic growth in a structured manner in the long term and improved the performance of companies within the sector.

FMCG market reached US\$ 167 billion as of 2023. Total revenue of FMCG market is expected to grow at a CAGR of 27.9% through 2021-27, reaching nearly US\$ 615.87 billion. In 2022, urban segment contributed 65% whereas rural India contributed more than 35% to the overall annual FMCG sales. Good harvest, government spending expected to aid rural demand recovery in FY24. The sector had grown 8.5% in revenues and 2.5% in volumes last fiscal year. In the January-June period of 2022, the

sector witnessed value growth of about 8.4% on account of price hikes due to inflationary pressures. In Q2, 2022, the FMCG sector clocked a value growth of 10.9% Y-o-Y higher than the 6% Y-o-Y value growth seen in Q1.

Indian food processing market size reached US\$ 307.2 billion in 2022 and is expected to reach US\$ 547.3 billion by 2028, exhibiting a growth rate (CAGR) of 9.5% during 2023-2028. The Union government approved a new PLI scheme for the food processing sector, with a budget outlay of Rs. 109 billion (US\$ 1.46 billion). Incentives under the scheme will be disbursed for six years to 2026-27.

Indian Flour Industry

India would expand at a compound annual growth rate (CAGR) of over 21% between 2016 and 2027. In 2022, the worldwide wheat flour industry was worth US\$ 241.0 billion. If the market continues to expand at its current rate, it might reach a new peak of Rs 25,000 Cr by the conclusion of the current fiscal year (2022-23).

A combination of positive micro and macroeconomic elements has created favorable conditions for market expansion. Despite this, more than 90% of the market for packaged wheat flour is concentrated in metropolitan areas. The demand for packaged wheat flour in India has been growing steadily, and this trend is expected to continue, especially as the top market players expand their reach into the country's rural market.

India's major shopping centers, supermarkets, and grocery/Kirana shops are the primary retail outlets for wheat flour packaging. On the other hand, the rise of E-Commerce, or online shopping, is having a major impact as a result of expanding internet access and improved computer technology. Demand for pre-packaged wheat flour in India by wheat flour manufacturers is expected to rise in the future due to rising employment rates among women and their preference for time-saving food options. IKON predicts that the market for packaged wheat flour would more than double in size between FYs 2019–20 and 2024–25 if current trends continue.

Trends

Organic food has become increasingly popular since it is grown without the use of harmful chemicals like pesticides and synthetic fertilizers or genetically engineered ingredients (GMOs). Increases in the rates of various chronic diseases, such as diabetes, cancer, and heart ailments, have a direct impact on the demand for organic wheat flour from consumers all over the world.

National Mission on Edible Oil-Oil Palm

Ministry of Agriculture & Farmers Welfare vide Press Information Bureau press release dated August 18, 2021 ("**Press Release**"), introduced the National Mission on Edible Oil-Oil Palm as a new centrally sponsored scheme which will benefit the oil palm farmers, increase capital investment, create employment generation, shall reduce the import dependence and also increase the income of the farmers. As per the Press Release there are two major focus areas of the scheme. The oil palm farmers produce FFBS from which oil is extracted by the industry. Presently the prices of these FFBS are linked to the international CPO prices fluctuations. For the first time, the Government of India will give a price assurance to the oil palm farmers for the FFBS. This will be known as the Viability Price ("**VP**"). This will protect the farmers from the fluctuations of the international CPO prices and protect them from the volatility. This VP shall be the annual average CPO price of the last 5 years adjusted with the wholesale price index to be multiplied by 14.3 %. This will be fixed yearly for the oil palm year from 1st November to 31st October. This assurance will inculcate confidence in the Indian oil palm farmers to go for increased area and thereby more production of palm oil. A Formula price ("**FP**") will also be fixed which will be 14.3% of CPO and will be fixed on a monthly basis. The viability gap funding will be the VP-FP and if the need arises, it would be paid directly to the farmers accounts in the form of DBT.

Reproduction of a copyrighted software for sale or hire or commercial rental, offer for sale or commercial rental, issuing copy(is) of the computer programme or making an adaptation of the work without consent of the copyright owner amount to infringement of the copyright. BUSINESS OVERVIEW

Our Company was originally incorporated with the name as "Hoac MP Atta Spices Manufacture Private Limited" a private limited company on March 13, 2018 under the Companies Act, 2013, with Registrar of Companies, Delhi bearing registration number 330739. Thereafter, the company name was changed to 'Hoac Foods India Private Limited' dated November 03, 2021. Subsequently, our Company was converted into a public limited company pursuant to a resolution passed by our Shareholders at an Extraordinary general meeting held on October 13, 2023 and consequently the name of our Company was changed to 'Hoac Foods India Limited' and a fresh certificate of incorporation dated 30th October, 2023 was issued by the Registrar of Companies, Delhi at New Delhi.

We have consistently grown in terms of our revenues over the past years. In the past three (3) years our revenues from operation were Rs.742.26 lakhs in F.Y. 2020-21, Rs.1,087.27 lakhs in F.Y.2021-22 and Rs. 1,208.56 lakhs in the FY 2022-23. Our Net Profit after tax for the above-mentioned periods are Rs.12.85 lakhs, Rs.27.33 lakhs and Rs.58.79 lakhs respectively.

Factors contributing to the growth of our Revenue:

1. For FY 2020-21 the following were the factors that contributed to growth of our revenue:

Organic Growth in Existing Product Lines:

Our revenue from operations saw substantial expansion, increasing from ₹628.56 lakhs in FY 2019-20 to ₹742.26 lakhs in FY 2020-21. This growth was primarily attributed to the successful realization of organic opportunities within our current product offerings, particularly in the sale of wheat and related products, as well as the thriving market for packed spices.

Diversification through New Product Launches:

In addition to capitalizing on the organic growth in our existing lines, we strategically introduced new combinations of spices. Notably, the launch of Sambhar masala, Chana masala, and Multigrain Atta contributed significantly to the overall growth in revenue from operations. This diversification allowed us to tap into emerging market demands and broaden our product portfolio.

Expansion through Franchise Ownership:

As part of our growth strategy, we expanded our presence by inaugurating a new franchise-owned outlet, Neelam Enterprises, located in Sector-49, Gurugram during the Financial Year 2021. This expansion initiative contributed to increased visibility and accessibility, playing a pivotal role in the overall revenue surge.

2. For FY 2021-22 the following were the factors that contributed to growth of our revenue:

Significant Surge in Revenue from Operations:

Our revenue from operations surged from ₹742.26 lakhs in FY 2020-21 to ₹1,087.27 lakhs in FY 2021-22, reflecting an impressive growth of almost 46.48%. This substantial increase was primarily attributed to the heightened growth traction observed in our existing product portfolios, which were initially launched in FY 2019-20.

Expansion of Company Outlets:

During FY 2021-22, we strategically increased our market presence by opening four new outlets. Among these, one was a company-owned outlet, and three were franchise-owned outlets. The new outlets included Ashok Flour Mill, Delicious, and Neelam Enterprises (located in Sec-69, Gurugram).

3. For FY 2022-23 the following were the factors that contributed to growth of our revenue:

Steady Revenue Increase:

Our revenue from operations experienced a positive trajectory, escalating from ₹1,087.27 lakhs in FY 2021-22 to ₹1,208.56 lakhs in FY 2022-23, marking a substantial growth of almost 11.16%. This noteworthy increase was primarily a result of strategic expansions in our business operations.

Strategic Addition of Franchise Outlets:

A factor contributing to our revenue increase was the addition of new franchise outlets, namely Farm2Home and Syna Foods. The establishment of these outlets played an important role in diversifying our market presence and capturing the growth potential in previously unexplored markets.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, amongst others equity shares. Pursuant to the SEBI UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the SEBI UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020, decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI. This Issue will be made under UPI Phase III of the UPI Circular.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn

or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

The Issue will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Issue Opening Date. If the Issue is made under UPI Phase III of the UPI Circular, the same will be advertised in English national daily newspaper and Hindi national daily, Hindi being the regional language of Delhi, where our Registered Office is located, each with wide circulation, on or prior to the Issue Opening Date and such advertisement shall also be made available to the Stock Exchange for the purpose of uploading on their websites.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/or payment instructions of the Retail Individual Bidders using the UPI Mechanism.

Multiple Applications

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications

- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of "know your client" norms by the depositories. Our Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.

An investor making application using any of channels under UPI Payments Mechanism, shall use only his / her own bank account or only his / her own bank account linked UPI ID to make an application in public issues. Applications made using third party bank account or using third party linked bank account UPI ID are liable for rejection. Sponsor Bank shall provide the investors UPI linked bank account details to RTA for purpose of reconciliation. RTA shall undertake technical rejection of all applications to reject applications made using third party bank account.

Our Company, in consultation with the Lead Manager reserves the right to reject, in its absolute discretion, all or any multiple applications in any or all categories. In this regard, the procedure which would be followed by the Registrar to the Issue to detect multiple applications is given below:

1. All Applications will be checked for common PAN. For Applicants other than Mutual Funds and FII subaccounts, Applications bearing the same PAN will be treated as multiple Applications and will be rejected.
2. For Applications from Mutual Funds and FII sub-accounts, submitted under the same PAN, as well as Applications on behalf of the Applicants for whom submission of PAN is not mandatory such as the Central or State Government, an official liquidator or receiver appointed by a court and residents of Sikkim, the Application Forms will be checked for common DP ID and Client ID.
