If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. The risk factors are classified as under for the sake of better clarity and increased understanding.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. Our manufacturing units are concentrated in Solan, Himachal Pradesh, and we are exposed to risks originating from economic, regulatory, political and other changes in this region, including natural disasters, which could adversely affect our business, results of operations and financial condition.***

As of date of this Draft Red Herring Prospectus, we operate two manufacturing units, in Solan, Himachal Pradesh. The geographic concentration of our manufacturing units heightens our exposure to adverse developments and economic shifts within this region. Any significant social, political, civil or economic disruptions, or instances of internal or external aggression or changes in the policies of state or local governments, in Solan, Himachal Pradesh in general, could have an adverse effect on our business, results of operations and financial condition.

Furthermore, the rocky terrains of Himachal Pradesh are prone to natural disasters including landslides, cloud bursts, earthquakes and floods. While we have not faced any significant impact of such natural disasters during the preceding three years, we cannot assure you that we will not face any natural disasters in the future. Any such instances of natural disasters could adversely affect our business, results of operations and financial condition.

Due to the concentration of our manufacturing units in Solan, Himachal Pradesh, regulations and policies of Himachal Pradesh have a significant effect on our business, results of operations and financial condition. Any significant change in existing policy applicable to our operations could require us to incur additional capital expenditure. Any such instances could adversely affect our business, results of operations and financial condition.

- 2. Any slowdown or shutdown in our manufacturing operations could have an adverse effect on our business, results of operations, financial condition and cash flows.***

Our business is dependent upon our ability to operate our manufacturing units without disruption. Factors beyond our control, including disruption in electrical power or water resources, political instability, industrial accidents or machinery breakdowns, severe weather conditions, natural disasters, and outbreak of infectious diseases, could result in a slowdown or shutdown of our operations and adversely affect our business, results of operations, financial condition and cash flows. Any major malfunction or breakdown of our machinery can also require us to incur significant repair and maintenance costs and lead to slowdown or shutdown of our operations. We cannot assure you that we may not need to incur any costs due to any major malfunction or breakdown of our machinery, or experience a slowdown or shutdown in our manufacturing operations in the future. If any of the foregoing were to occur, our business, results of operations, financial condition and cash flows could be adversely affected.

- 3. Any manufacturing or quality control concerns or our inability to deliver products on a timely basis, or at all, could result in the cancellation of purchase orders, breaches of relevant agreements, and termination of agreements by our clients and distributors, which could have an adverse effect on our business, results of operations, financial condition and cash flows.***

As a contract manufacturer, we own and operate manufacturing units to produce a wide range of dosage forms. Our operations are subject to government policies, international standards and prescribed client quality norms. We typically enter into contracts with other pharmaceutical companies to provide manufacturing solutions. These contracts typically range from a specified period and are renewable by us as per mutually agreeable terms.

We are required to meet quality standards and other specifications set out in our contractual arrangements or as prescribed under the applicable regulatory framework. Further, as per the terms of a majority of our contractual obligations, we are responsible for the procurement of raw materials and packaging materials, in strict adherence to client specifications and regulatory requirements. Disputes over non-conformity of products manufactured by us with such quality standards or specifications, or our inability to procure appropriate materials may lead to a disruption in our business, and may expose us to legal, financial and reputational risks. As a manufacturer, we are also subject to the risk of our products being returned to us or claims resulting from manufacturing defects or negligence in storage and handling of products. While there have not been any material instances, where our products were either voluntarily recalled by us, or were returned by our clients, due to quality control issues. We cannot assure you that we will continue to be in compliance with the relevant regulatory and contractual requirements for quality control standards in the future. Any product recall or sales returns due to quality concerns or non-compliance with quality standards could adversely affect our business, results of operations, financial condition and cash flows.

- 4. Our manufacturing units are subject to periodic inspections and audits by regulatory authorities and clients. We may be subject to regulatory action which may damage our reputation leading to an adverse effect on our business, results of operations, financial condition and cash flows.***

As a manufacturer of pharmaceutical formulations, we are required to comply with the regulations and quality standards stipulated by the regulatory authorities in India and the countries to which our customers export their products. We are also required to comply with global practice standards such as the World Health Organization Good Manufacturing Practice, United States National Sanitation Foundation, *etc.* Our manufacturing units are also subject to periodic inspections and audits by these regulatory authorities and our clients. Our manufacturing units have been accredited by global regulatory agency i.e. World Health Organization Good Manufacturing Practice (“**WHO-GMP**”). During the Financial Years 2024, 2023 and 2022, our manufacturing units were subject to 8 (eight) audits in Unit I and 7 (seven) audits in Unit II by our clients and 3 (three) inspections by our regulators. If we are not in compliance with the requirements prescribed by such authorities or terms stipulated in contracts with our clients, we may be subject to regulatory actions, including issuance of warning letters, imposition of sanctions, amendment or withdrawal of our existing approvals, product seizure, interruption of our operations, or claims resulting from non-compliance with contractual obligations. Any such actions may adversely affect our business, results of operations, financial condition and cash flows. We cannot assure you that we will not be subject to regulatory actions or claims resulting from non-compliance with contractual obligations in the future. Any of the foregoing could adversely affect our business, results of operations, financial condition and cash flows.

5. *We rely on domestic and international third-party suppliers for the supply of raw materials and any delay, interruption or reduction in such supply could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on domestic and international third-party suppliers for the supply of a majority of our raw materials. The details of raw materials required for our operations are provided below:

S. No.	Raw Material	Source
1.	LDPE Granules	Sourced domestically in India from the importer who imports the same from M/s. Lyondell Basel, Netherland
2.	Active pharmaceutical ingredient (API) <ul style="list-style-type: none"> ➤ Sterile Powder for Injections ➤ Dry powder for Oral suspension 	Sources domestically from Indian companies
3.	Primary Packing Material <ul style="list-style-type: none"> ➤ Glass Vials (Type-I/ type II/ Type III) ➤ Glass Vials (Tubular) ➤ Butyl Rubber Bung ➤ Flip off seals 	Sources domestically from Indian companies.

5.	Tertiary Packing Materials <ul style="list-style-type: none"> ➤ Shrink Wrap ➤ BOPP Tape Corrugated boxes	Sources domestically from Indian companies.

Our success depends on the uninterrupted supply of raw materials required for our manufacturing activities. We do not have long-term contractual arrangements with our suppliers and procure raw materials through purchase orders entered into with our suppliers. Raw materials, including packaging materials, are susceptible to supply disruptions and price volatility influenced by a range of factors including fluctuations in commodity markets, the quality and availability of raw materials, currency fluctuations, consumer demand, and changes in government policies and regulatory sanctions.

A break up of the expenses incurred from top five and top ten suppliers are as under:

Particulars	May 31, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount	Percentage (%)	Amount	Percentage (%)	Amount	Percentage (%)	Amount	Percentage (%)

Top 10 suppliers	492.45	75.47	2,709.03	70.34	1,868.63	76.91	2,064.57	78.73

Furthermore, we also depend on third-party transportation providers for the delivery of raw materials and logistics services, and do not have long-term contractual arrangements with such providers. Any disruptions in these services could impede our ability to secure raw materials and deliver products on time. Although we have not encountered any major disruptions in the supply of raw materials in the past, we cannot assure you that we may not encounter any delay, interruption or reduction in the supply of raw materials in the future. Any such instance could adversely affect our business, results of operations, financial condition and cash flows.

6. ***Our business is dependent on sale of products to a limited number of clients for a significant portion of our revenues. The loss of one or more such clients or the deterioration of their financial condition or prospects could adversely affect our business, results of operations and financial condition.***

Our business is dependent on the sale of products to a limited number of clients for a significant portion of our revenues. A break up of the revenue earned from top five and top ten customers are as under:

Particulars	May 31, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount	Percentage (%)	Amount	Percentage (%)	Amount	Percentage (%)	Amount	Percentage (%)
Top 5 customers	661.71	62.85%	2,752.77	51.22%	3,141.05	79.54%	3,591.09	80.05%
Top 10 customers	864.69	82.13%	3,824.93	71.16%	3,731.12	94.48%	4,216.10	93.98%

A majority of our contract manufacturing business is conducted through purchase orders that are placed with us by our clients from time to time. Prior to the issuance of purchase orders, we enter into agreements with our clients to set out the broad parameters of our arrangement, including but not limited to the term of the agreement, the products to be manufactured and provisions relating to inspection and audit of our manufacturing units. We also have long-term supply agreement with pharmaceutical companies, as per the below details:

S. No.	Name of client	Date of Agreement	Valid till
1	Medibox Pharma Private Limited	December 23, 2023	March 31, 2028
2	Nicholas Healthcare Limited	January 14, 2024	March 31, 2029
3	Plenteous Pharmaceuticals Limited	January 14, 2024	March 31, 2029
4	Aspire India Lifecare LLP	June 18, 2024	5 years from the date of execution

We do not have exclusive arrangements with some of our clients, including our key clients, and our clients may discontinue their relationship with us. If our largest clients or a number of our clients cease to purchase products from us, our business, results of operations and financial condition could be adversely affected

7. ***Our Company is reliant on the demand from the pharmaceutical industry. Any downturn in the pharmaceutical industry or an inability to increase or effectively manage our sales could have an adverse impact on our Company's business and results of operations.***

We are engaged in the business of manufacturing sterile water for injections, dry powder injections and dry syrup for India and overseas, either independently or on a contract manufacturing basis. Our revenues are highly dependent on our customers from the pharmaceutical industry and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations.

Further, in the event, there takes place a shift of practice of developing raw materials in-house in the pharmaceutical industries or the other industries which we cater to, it may have an adverse impact on the demand for our products. Similarly, in the event of any new breakthrough in the development of a novel product or raw material by our competitors or customers, our products may become obsolete or be substituted by such alternatives; thereby impacting our revenues and profitability adversely. It may also happen that our competitors are able to improve the efficiency of their manufacturing process or their distribution or raw materials sourcing process and thereby offer their similar or high quality products at lower price our Company may be unable to adequately react to such developments which may affect our revenues and profitability.

8. ***The commercial success of our products depends to a large extent on the success of the products of our customers. If the demand for the products of our customers declines, it could have a material adverse effect on our business, financial condition and results of operations.***

The products manufactured and supplied by us are primarily for reputed pharmaceutical manufacturers. For further details, please refer to the chapter titled “*Our Business –Our Product Portfolio*” at page 118 of this Draft Red Herring Prospectus. The demand of our products is directly proportional to the demand of the products of our customers for whom we manufacturer products. Therefore, the commercial success of our business is highly dependent on the commercial viability, demand and success of the end use products of our customers. Our Sterile Water for Injections is used as secondary packing material by other pharmaceutical companies. Any downturn in the demand of such products could have a direct impact on the demand of our contract manufacturing services and our business operations. Any disturbance in the industry in which our customers supply their end use products could adversely impact our business due to our high dependence on our customers. A reduction in the demand, development and production activities in the industries in which the end use products of our customers are supplied to, may correspondingly cause a decline in the demand for our products due to a slump in the business activities of our customers. Alternatively, in the event our customers are able to devise a manufacturing process of their own or if our customers are able to find a cheaper alternative for our products, it may conversely result in a reduction in the demand of our products and have a material adverse effect on our business, financial condition and results of operations. Our failure to effectively react to these situations or to successfully introduce new products or new applications for our existing products could adversely affect our business, prospects, results of operations and financial condition.

9. *We may face several risks associated with the proposed expansion of our manufacturing facilities, which could hamper our growth, prospects, cash flows and business and financial condition.*

We intend to utilize a portion of the Net Proceeds of this Issue towards upgradation of our Unit I, to manufacture large volume parentals for intravenous use, which will be sold under Onyx brand name to pharma companies, distributors, stockists and hospitals. We also intend to setup a high-speed cartooning packaging line at Unit II for Dry Powder Injections. We believe that setting up a high-speed cartooning packaging line which will enable us to (i) complete packaging at a considerably quicker rate; (ii) Cost efficiency by reducing manpower cost; and (ii) Ensure product safety and error free output. These will contribute immensely towards our business operations and market position. For further details, please refer to the chapter titled “*Object of the Issue*” at page 80 of this Draft Red Herring Prospectus.

During the process of expansion of our manufacturing facilities, we may face several difficulties such as cost overruns or delays for various reasons, including, but not limited to, our financial condition, changes in business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations, changes in design and configuration, increase in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, start-up costs, interest and finance charges, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management.

Any delay in expansion of our manufacturing facilities could lead to revenue loss for our Company. Further, our expansion plan may be subject to delays and other risks, which may be caused due to certain other unforeseen events, such as unforeseen engineering or technical problems, disputes with workers, unanticipated cost increases or changes in scope and delays in obtaining certain property rights and government approvals and consents. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost and time over-runs and any loss of profits resulting from such delays, shortfalls and disruptions.

Further, the budgeted cost may prove insufficient to meet the requirements of the proposed capital expenditure due to, among other things, cost escalation, which could drain our internal cash flows or compel us to raise additional capital, which may not be available on terms favorable to us or at all. We cannot assure that we will be able to complete the aforementioned expansion of our manufacturing units in accordance with the proposed schedule of implementation and any delay in setting up such plants in a timely manner, or at all, could have an adverse impact on our growth, prospects, cash flows and business and financial condition.

We also cannot assure you that we will be able to receive the approvals for the new facilities in a timely manner. If we are not able to receive the required approvals at all or if there is a delay in receiving the same, all other operations, which are to be undertaken for the completion of the manufacturing unit might also be delayed. The quotations for plant and machinery and civil works received by us from various suppliers and contractors might expire and we may be compelled to purchase the same at a higher cost. Our financial condition, results of operations and liquidity would be materially and adversely affected if our project or construction costs materially exceed such budgeted amounts. For further details, please refer to chapters titled — “*Objects of the Issue*” and “*Our Business*” on pages 80 and 115, respectively of this Draft Red Herring Prospectus.

- 10. We cannot assure you that the proposed expansion of our manufacturing units will become operational as scheduled, or at all, or operate as efficiently as planned. If we are unable to commission our new facilities in a timely manner or without cost overruns, it may adversely affect our business, results of operations and financial condition.**

We intend to utilize a portion of the Net Proceeds of this Issue towards upgradation of our Unit I, to manufacture large volume parentals for intravenous use, which will be sold under Onyx brand name to pharma companies, distributors, stockist and hospitals. We also intend to setup a high-speed cartooning packaging line at Unit II for Dry Powder Injections. We believe that setting up a high-speed cartooning packaging line which will enable us to (i) complete packaging at a considerably quicker rate; (ii) Cost efficiency by reducing manpower cost; and (ii) Ensure product safety and error free output. These will contribute immensely towards our business operations and market position. For further details, please refer to the chapter titled “*Object of the Issue*” at page 80 of this Draft Red Herring Prospectus.

Our expansion plan may be subject to delays and other risks, among other things, unforeseen engineering or technical problems, disputes with workers, force majeure events, unanticipated cost increases or changes in scope and delays in obtaining certain property rights and government approvals and consents. Additionally, we may face risks in commissioning the proposed facilities including but not limited to, delays in the construction or for other unknown reasons, our proposed facilities do not function as efficiently as intended, or utilisation of the proposed facilities is not optimal, we may not be able to take additional orders to produce anticipated or desired revenue as planned any of which could result in delays, cost overruns or the termination of the plan for expansion of our manufacturing units.

In the event of any delay in the schedule of implementation or if we are unable to complete the project as per the scheduled time, it could lead to revenue loss. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. As a result our business, financial condition, results of operations and prospects could be materially and adversely affected. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 80 of this Draft Red Herring Prospectus.

- 11. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers’ expectations.**

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal and international quality standards. We are engaged in export operations as well and have to fulfill the quality conditions and processes prescribed under the international quality standards. We have a separate Quality Division which carries out necessary standard operating procedures and standard test procedures on the raw materials and the finished products. However, we cannot assure you that our quality control processes or our product will pass the quality tests and inspections conducted by various international and domestic agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the international quality standards set by our international customers and agencies as deviation from the same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

- 12. Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business prospects and results of operations.**

Regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our manufacturing and/or distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing and marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

- 13. There have been instances of delays in payment of statutory dues, i.e. GST by the Company. In case of any delay in payment of statutory due in future by our Company, the Regulatory Authorities may impose monetary penalties on us or take certain punitive actions against our Company in relation to the same which may have adverse impact on our business, financial condition and results of operations.**

In the past, there have been certain instances of delays in payment of statutory dues, i.e. GST, by the Company. The details of the delay caused in payment of statutory dues have been provided below:

GSTR3B : [02AAACO8296M1Z1] - (02) [Himachal Pradesh]

Month	Due Date of filing	Date of Filing Return	Reason of Delay	Delay Period
March, 2024	20/04/2024	01/05/2024	Delay in Reconciliation of GST	11 Days
March, 2023	20/04/2023	27/04/2023	Delay in Reconciliation of GST	7 Days

It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to payment of statutory dues. The happening of such event may cause imposition of fine/penalty which may have adverse effect on the results of our operations and financial position.

- 14. There have been instances of delays in filings of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to ROC.**

In the past, there have been certain instances of delays in filing statutory forms which have been subsequently filed by payment of an additional fee as specified by ROC. The details of such forms have been provided below:

Form Type	Due Date of Filing	Actual Date of Filing	Reason for Delay	Delay Period
AOC-4 (2022-23)	29.10.2023	21.11.2023	Delay in generating XBRL	11 Days

No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

- 15. If our product development efforts do not succeed, we may not be able to improve our existing products and/or introduce new products, which could adversely affect our results of operations, growth and prospects. Further, if we are unable to anticipate and respond to changes in the market trends and changing customer preferences in a timely and effective manner, or if we fail to maintain our reputation, brand value or increase the market for our**

products, the demand for our products may decline.

In order to remain competitive, we are required to review the performance of our existing products and the manufacturing process and take necessary actions to improve functionality and/or efficiency and also identify new applications for our existing products and new potential products, in compliance with applicable regulatory standards. We intend to utilise a portion of the Net Proceeds towards upgradation of our Unit I, to manufacture large volume parentals for intravenous use, which will be sold under Onyx brand name to pharma companies, distributors, stockists and hospitals. This will enable our Company to cater the entities which are operating in critical care space of healthcare industry. This will also enable us to offer all three categories of sterile products to our customers. Our investments towards product development could result in higher costs without a corresponding increase in revenues. However, we cannot assure you that the product development initiatives taken by our Company would succeed or result in an improvement in either our existing products or manufacturing process which may affect our ability to compete with our competitors and have an adverse effect on our operations. Further, our product development initiatives with respect to developing new uses for existing products or new products may not result in the development of cost-effective or economically viable solutions, thereby affecting our operations, growth and prospects.

If we are unable to gauge the changing technology and demand in the industry and are unable to upgrade our product portfolio in line with the same it may have an adverse effect on our business operations. Our products have varied applications and are majorly used in the pharmaceutical, food, nutraceuticals and cosmetic industries. Since our products form a key raw material for manufacturing the end us products of our customers, we are expected to be aware of the changing technologies and regulatory requirements. A significant feature of the pharmaceutical industry is the rapidly innovating technology and advancement in the research and development of the products. Therefore, results of our operations are dependent on our ability to anticipate, gauge and respond to such changes and devise new products or modify our existing products in lines with the changes in market trends as well as customer demands and preferences. If we are unable to respond to the technological advancements or upgrade our products periodically as per the prevalent market trends, or if we are unable to adapt to such changes by launching new products as per the demand, we may significantly lose our market position and existing customer base which may adversely affect our results of operations and financial condition.

Maintaining and enhancing our brand recognition and reputation is critical to our business and the competitiveness of our products. Many factors, some of which are beyond our control, are important for maintaining and enhancing our brand reputation and competitiveness of our products, including maintaining or improving customer satisfaction and increasing the popularity of our products. If we fail to maintain our reputation, or increase the market for our products, or the quality of our products declines, our business and prospects may be adversely affected.

16. Our Company is yet to place orders for the plant and machinery for the proposed expansion of our manufacturing units. Any delay in placing orders or procurement of such plant and machinery may delay the schedule of implementation and possibly increase the cost of commissioning the manufacturing unit.

Our Company has received third party quotations for the plant and machinery required to be installed in the proposed facility in our manufacturing units, for details please refer to the chapter titled “*Objects of the Issue*” on page 80 of this Draft Red Herring Prospectus. Although, we have identified the type of plant and machinery to be purchased for the proposed facility, we are yet to place order for 100% of the plant and machinery. The cost of the machineries (including civil and electrical work) is based on the quotations received from suppliers and such quotations are subject to change due to various factors such as, change in supplier of equipment, change in the government regulation and policies, change in management’s view of desirability of the current plans, possible cost overruns, etc. Since, we have not yet placed orders for 100% of our plant and machinery we cannot assure that we will be able to procure the same in a timely manner and at the same price at which the quotations have been received. Delay in procurement of the same can cause time and cost overrun in the implementation of our proposed expansion of the manufacturing units and can also compel us to buy such machineries at a higher price, thus causing the budgeted cost to vary. As a result our business, financial condition, results of operations and prospects could be materially and adversely affected.

17. The cost estimates for the proposed expansion of our manufacturing units have been derived from internal estimates of our management and may not be accurate.

The anticipated cost of the proposed expansion of our manufacturing units will be ₹ ₹607.70 Lakhs for unit I and ₹124.05 Lakhs for unit II. For ascertaining this cost, reliance has been placed on the estimates, budgets and numerous assumptions made by our management and any bank or financial institution has not appraised the same. The actual costs of expansion of our manufacturing units may exceed such budgeted amounts due to a variety of factors such as

construction delays, escalation cost of raw material, interest rates, labour costs, regulatory and environmental factors, weather conditions and our financing needs. Our financial condition, results of operations and liquidity would be materially and adversely affected if our expansion costs materially exceed such budgeted amounts. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected. For further details of the scheduled operational dates of our proposed unit, see “*Objects of the Issue*” on page 80 of this Draft Red Herring Prospectus.

- 18. *We are subject to the risk of loss due to fire, accidents and other hazards as our manufacturing processes utilize materials that are highly flammable and hazardous. Any failure to comply with existing and future regulatory requirements or non-compliance with and changes in, safety, health, environmental and labour laws and other applicable regulations, could adversely affect our business, results of operations, financial condition and cash flows.***

We utilise flammable and hazardous materials in our manufacturing processes. The improper handling or storage of these materials could result in fire, industrial accidents, property damage and damage to the environment. In order to safeguard our manufacturing units and personnel, we have implemented various safety and mitigation measures at our manufacturing units including upgrading risk management controls at our manufacturing units, carrying out requisite training programmes for our employees and contractors, conducting industrial hygiene and risk-based assessments, employing fire prevention and protection measures, onsite emergency plans and mock drills, among others. We cannot assure you that any such incidents may not occur in the future. In the event that any of our manufacturing units are adversely affected due to fire, industrial accidents, or from improper handling of flammable and hazardous materials, we may be required to temporarily reduce our manufacturing capacity and/or suspend our operations, which could adversely affect our business, results of operations, financial condition and cash flows.

We may also be subject to environmental compliance risks, as well as the potential for discharges that could damage to the environment. In such instances, we may be compelled to incur costs to rectify the damage, as well as pay fines and other penalties for non-compliance with environmental regulations, which could adversely affect business, results of operations, financial condition and cash flows.

- 19. *We operate in a market that is highly competitive to provide outsourced pharmaceutical manufacturing services, particularly for formulations, to clients in India and other jurisdictions.***

As a contract manufacturer in the pharmaceutical industry, we compete to provide a comprehensive range of pharmaceutical products and services to our clients. For our contract manufacturing business, our primary competitors are full-service pharmaceutical outsourcing or contract manufacturing companies, contract manufacturers focusing on a limited number of dosage forms, contract manufacturers providing multiple dosage forms, and large pharmaceutical companies offering third-party manufacturing services to fill their excess capacity. We also compete with other pharmaceutical companies involved in marketing pharmaceutical formulations and other API developers. Some of our competitors may possess substantially greater manufacturing, financial, marketing, technical, or other resources than us. This provides them with a potential advantage, enabling more agile responses to changes in market demand through the introduction of new, alternative, or emerging technologies. Further, our competitors may succeed in developing products that are more effective, more popular or cheaper than any products we may develop, which may render our products obsolete or uncompetitive, and we may be unable to achieve the desired growth. Should our competitors gain significant market share at our expense, particularly within our focused therapeutic areas, it could have an adverse effect on our business, results of operations, and financial condition.

- 20. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.***

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. Any delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company’s results of operations and financial condition. There is no guarantee on the timeliness of all or any part of our customers’ payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

21. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could adversely affect our business, results of operations and financial condition.*

We have experienced considerable growth over the past three years and we have expanded our operations and product portfolio. We cannot assure you that our growth strategies will continue to be successful or that we will be able to continue to expand further, or at the same rate.

Our inability to execute our growth strategies in a timely manner or within budget estimates or our inability to meet the expectations of our customers and other stakeholders, could have an adverse effect on our business, results of operations and financial condition. Our future prospects will depend on our ability to grow our business and operations. The development of such future business could be affected by many factors, including general, political and economic conditions in India, government policies or strategies in respect of specific industries, prevailing interest rates and price of equipment and raw materials. Further, in order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs, hire and retain new employees or operate our business effectively. Failure to manage growth effectively could adversely affect our business and results of operations.

22. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. The pharmaceutical industry all over the world is expecting an increase in demand which would directly increase the demand of our products due to their usage as a pharmaceutical products. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amounts of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

23. *We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.*

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in

business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information of our Company and of our customers. For the purpose of undertaking contract manufacturing, our customers share critical confidential information in respect of their formulations. If any of such information is leaked, the business operations of our customers could be adversely impacted. Further, our customers may not trust us with their important information or approach us for undertaking contract manufacturing of their products. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

24. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the pharmaceutical industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

25. *Our application for certain licenses, approvals and registrations, which are required for our Company's operations and business, are pending before the relevant authorities. Not receiving these licenses, approvals and registrations in a timely manner or at all may lead to interruption of our Company's operations.*

We require certain statutory and regulatory approvals, licenses, registrations and permissions to operate our manufacturing units, some of which are granted for a fixed period of time and need to be renewed from time to time. Our Company has made applications before the relevant authorities for (a) renewal of Consent to Operate for Unit I before the State Pollution Control Board, Himachal Pradesh on July 6, 2024 vide application no. 12078225 under the Water Act, 1974 & the Air Act, 1981; (b) renewal of Consent to Operate for Unit II before the State Pollution Control Board, Himachal Pradesh on July 30, 2024 vide application no. OR5011N020467 under the Water Act, 1974 & the Air Act, 1981; (c) issuance of License to work a Factory on March 5, 2024 vide application no. A24c123312 under

the provision of Factories Act, 1948; and (d) issuance of Registration Certificate dated July 31, 2024 under the Punjab Shops and Commercial Establishment Act, 1958 for our Corporate Office.

Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may adversely affect our business. For further details on the licenses obtained by our Company, please refer to the chapter titled — “*Government and Other Statutory Approvals*” on page 235 of this Draft Red Herring Prospectus.

26. Our Company has applied for registration of certain trademarks in its name. Until such registrations are granted, our Company may not be able to prevent unauthorised use of such trademarks by third parties, which may lead to the dilution of our goodwill.

Our Company has made the applications for registering our logo [Onyx](#). Pending the registration of our trademark, any other vendor in the similar line of business as our may use the above-mentioned trademark and we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. Further, our applications for the registration of trademark may be opposed by third parties, and we may have to incur significant cost in relation to these oppositions. In the event we are not able to obtain registrations due to opposition by third parties or if any injunctive or other adverse order is issued against us in respect of any of our trademark for which we have applied for registration, we may not be able to use such trademark and / or avail the legal protection or prevent unauthorized use of such trademarks by third parties, which may adversely affect our goodwill and business. For further details on the trademarks, registered or pending registration, please refer to the chapters titled “*Our Business - Intellectual Property*” and “*Government and Other Approvals - Intellectual property*” on pages 137 and 239, respectively, of this Draft Red Herring Prospectus.

27. Our Company has issued Equity Shares in the last one year at a price which may be lower than the Issue Price.

We have issued Equity Shares in the preceding one year at a price which may be lower than the Issue Price. The details of the Equity Shares have been provided below:

Date of Allotment	No. of Equity Shares	Face value (₹)	Issue Price (₹)	Nature of consideration	Nature of Allotment

For details in respect of list of allottees, please see “- Share Capital History of our Company - Equity Share Capital” on page 68.

We cannot assure you that any issuance of Equity Shares made by our Company post completion of this Issue will be above the Issue Price or the prevailing market price of our Equity Shares. For further details, please see “*Capital Structure*” on page 68.

28. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.

Our Company seeks to grow its market reach domestically as well as internationally to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the pharmaceutical industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at

present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

29. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

(₹ in lacs)				
Particulars	May 31, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Net Cash Flow from/(used in) Operating Activities	(119.41)	151.62	623.60	48.55
Net cash generated from/(used in) investing activities	3.89	(314.79)	(2,267.19)	(577.59)
Net Cash Flow from/(used in) Financing Activities	29.02	309.11	1,642.97	519.78

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

30. We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our finished products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing unit and transportation of our finished products from our unit to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our finished products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long term agreements with our transporters for any of our manufacturing unit and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfil their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

31. We have significant power requirements for continuous running of our manufacturing units. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.

Our manufacturing units have significant electricity requirements and any interruption in the supply of power may temporarily disrupt our operations. All our manufacturing units receive power supply from local power authorities. Since, we have a significant power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing units and thereby cause an increase in the production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled "Our Business" on page 115 of this Draft Red Herring Prospectus.

32. Our Promoters, Directors, Senior Management and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.

Our Promoters, Directors, Senior Management and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director, Senior Management and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled — “*Our Promoters and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 162, 169, 217 and 175, respectively of this Draft Red Herring Prospectus.

There can be no assurance that our Promoters, Directors, Senior Management and Key Managerial Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

- 33. *Our Promoters, Directors and members of Promoter Group have extended personal guarantees with respect to loan facilities availed by our Company. Further, our Promoters have extended personal properties as collateral for securing the facilities availed by our Company. Revocation of any or all of these personal guarantees or withdrawal of such properties may adversely affect our business operations and financial condition.***

Our Promoters, Directors and members of our Promoter Group, Sanjay Jain, Naresh Kumar, Parmjit Kaur, Lakshya Jain, Harsh Mahajan, Ramesh Kumar and Meenu Jain have extended personal guarantees in favour of certain banks with respect to the loan facilities availed by our Company from them. Our Promoters have provided his personal property as collateral for securing the loans availed by our Company. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or an additional security or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. In the event if the personal property of our Promoters is withdrawn, our lenders may require us to furnish alternate properties or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative properties in a timely manner or at all. If the properties are withdrawn, the ability of our Company to continue its business operations could be adversely affected. If our lenders enforce these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations.

- 34. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.***

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●]% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company’s best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

- 35. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.***

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined through a Book Building Process. For further details regarding average cost of

acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “*Capital Structure*” on page 68 of this Draft Red Herring Prospectus.

36. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

37. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of May 31, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “*Restated Financial Information*” at page 175.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

38. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 217 of this Draft Red Herring Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

39. *Our Company has availed certain unsecured loans from our Promoters and third parties, which are recallable in nature.*

As on May 31, 2024, our Company has outstanding current unsecured loans which have been extended by our Promoters and third parties which may be recalled at any time. We cannot assure you that our lenders would not demand repayment of unsecured loans extended to us. In the event, our lenders seek repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to carry out the operations or complete our ongoing operations. Therefore, any such demand may

adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page 217 of this Draft Red Herring Prospectus.

- 40. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.***

As on May 31, 2024, our Company’s total secured indebtedness is ₹2,874.41 lacs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 217 of this Draft Red Herring Prospectus.

- 41. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 80 of this Draft Red Herring Prospectus.

- 42. *If we are unable to identify customer demand accurately and maintain an optimal level of inventory proportionately, our business, results of operations and financial condition may be adversely affected.***

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements for our products based on past data. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively by readily making our products available to our customers. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across raw material procurement, manufacturers, suppliers, warehouse management and departmental coordination. While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we over-stock inventory, our capital requirements may increase and we may incur additional financing costs. Any unsold inventory would have to be sold at a discount, leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations and financial condition. If we under-stock inventory, our ability to meet customer demand may be adversely affected.

- 43. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability

to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 155 of this Draft Red Herring Prospectus.

44. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters.

There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

45. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Although our Company has declared dividends in the past, however there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” and the chapter titled “*Financial Indebtedness*” on pages 174 and 217 respectively, of this Draft Red Herring Prospectus.

46. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

As the issue size shall be less than ₹10,000 lacs, under Regulation 41 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 68 of this Draft Red Herring Prospectus.

47. *We have not independently verified certain data in this Draft Red Herring Prospectus.*

We have not independently verified data from the Industry and related data contained in this Draft Red Herring Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the

statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

48. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

49. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for purchasing plant and machinery, primarily, as detailed in the chapter titled "Objects of the Issue" beginning on page 68 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

50. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

51. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 52. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.***

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

- 53. *Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Red Herring Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.***

Our Company intends to use the Net Proceeds towards funding of working capital requirements and repayment of borrowings. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its inter se allocation across various heads, as disclosed in the section titled “*Objects of the Issue*” on page 68.

In case of any exigencies arising out of business conditions, economic conditions, competition or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure or fund which expenditure cannot be determined with certainty as on the date of this Draft Red Herring Prospectus. In terms of Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Red Herring Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in the Draft Red Herring Prospectus, we cannot assure that we will be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Draft Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

- 54. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.***

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within three (3) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

- 55. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Our listed Equity Shares will be subject to a daily “circuit breaker” imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares’ circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

56. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts’ estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- significant developments in India’s economic liberalisation and deregulation policies;
- significant developments in India’s fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

57. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

58. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class actions, under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

ISSUE SPECIFIC RISKS

- 59. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a Book Building Process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 60. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.***

The Issue Price of the Equity Shares will be determined by our Company in consultation with the BRLM through a Book Building Process. This price will be based on numerous factors, as described under “*Basis for Issue Price*” on page 80 of this Draft Red Herring Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that as an investor you will be able to sell their Equity Shares at or above the Issue Price.

- 61. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

- 62. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

- 63. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

64. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

65. *QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

66. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

67. *Any issuance or sale of the Equity Shares by any existing shareholder could significantly affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by us or the disposal of Equity Shares by any of the major shareholders or the perception that such issuance or sales may occur may significantly affect the trading price of the Equity Shares. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber their Equity Shares.

68. *The Equity Shares issued pursuant to the Issue may not be listed on BSE and NSE in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Equity Shares to be submitted and there could therefore be a failure or delay in listing the Equity Shares on BSE and NSE. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares.

69. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the BRLM, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell

their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

70. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including: volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the LED and hearing aid industry; adverse media reports on us or the Indian LED and hearing aid industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

71. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.*

The Equity Shares will be listed on the BSE and the NSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI. We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

EXTERNAL RISK FACTORS

72. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 ("**Finance Act**"). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 ("**PDP Bill**") was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India ("**MoEIT**") has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body,

of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

73. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our activities in India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries; and
- prevailing national, regional or global economic conditions, including in India's principal export markets.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the industries in which we operate.

74. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

75. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

76. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

77. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

78. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

79. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

For further details on the method and procedure for Bidding, please see section entitled “*Issue Procedure*” on page 259 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

INDUSTRY OVERVIEW

GLOBAL ECONOMY

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia's war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events. Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of pre-pandemic (January 2020) projections, especially in emerging market and developing economies.

The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its pre-pandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below pre-pandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with pre-pandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below pre-pandemic projections. Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to pre-pandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes.

Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis. Divergences in labour market performance across regions broadly mirror those for output and consumption. Employment and labour participation rates are estimated to exceed prepandemic trends in advanced economies but to remain significantly below them in emerging market and developing economies, reflecting more severe output losses and much weaker social protection. Countries that had the most limited fiscal space are also those where employment shortfalls are the largest (ILO 2023). Among advanced economies, the euro area has seen larger employment gains than the United States. This may reflect more extensive use in the former of worker-retention programs modelled on the German Kurzarbeit short-time work scheme (IMF 2020), which protect workers' income and allow businesses to retain firm-specific human capital, reducing the costly process of separation, rehiring, and training. In the euro area, these programs bolstered employment during the most challenging phases of the crisis and accelerated the recovery when economies reopened.

Investment, on the other hand, has uniformly fallen short of pre-pandemic trends across regions. Businesses have shown less enthusiasm for expansion and risk taking amid rising interest rates, withdrawal of fiscal support, dimmer prospects for product demand, stricter lending conditions, and growing uncertainties regarding geoeconomic fragmentation. Higher leverage has further dampened investment which remains 3 percent to 10 percent lower across regions than had been projected before the pandemic. Moreover, the pandemic, war in Ukraine, and worsening climate shocks have contributed to a reversal in decades-long poverty reduction trends. According to World Bank staff estimates, 75 million to 95 million more people were living in extreme poverty in 2022 compared with pre-pandemic estimates. Spikes in food prices and related insecurities following Russia's invasion of Ukraine, as well as bouts of extreme weather, have accentuated these difficulties. The global average temperature in July 2023 was the highest on record for any month, amid reports of catastrophic flooding, heat waves, and wildfires in many regions. Overall, the global prevalence of undernourishment is significantly higher than before the pandemic.

OVERVIEW OF THE INDIAN ECONOMY

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. - Between April 2000–December 2023, cumulative FDI equity inflows to India stood at US\$ 971.52 billion.
- In February 2024, the overall IIP (Index of Industrial Production) stood at 147.2. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 139.6, 144.5 and 187.1, respectively, in February 2024.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.69% in December 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 8.06 billion) in India during January-April 2024.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In

the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

OPPORTUNITIES AROUND IN CLINICAL TRIALS AND HIGH-END DRUGS

India is among the leaders in the clinical trial market. Due to a genetically diverse population and availability of skilled doctors, India has the potential to attract huge investments to its clinical trial market. In October 2021, AstraZeneca India launched a Clinical Data and Insights (CDI) division to further strengthen its global presence and manage data-related aspects of its clinical trials. In November 2021, US-based Akston Biosciences announced that it will start the clinical trial of its second-generation COVID-19 vaccine 'AKS-452' in India soon.

Due to increasing population and income levels, demand for high- end drugs is expected to rise. Growing demand could open up the market for production of high- end drugs in India.

With 70% of India's population residing in rural areas, pharma companies have immense opportunities to tap this market. Demand for generic medicines in rural markets has seen a sharp growth. Various companies are investing in the distribution network in rural areas.

Contract research and manufacturing services (CRAMS) is one of the fastest growing segments in the pharmaceutical and biotechnology industry. The pharmaceutical market uses outsourcing services from providers in the form of contract research organizations (CROs) and contract manufacturing organizations (CMOs).

Product Development

Our Company does undertake in-house R&D for the launch of any new product in our manufacturing units. However, we do not undertake any R&D for New Drug Application (NDA). Our R&D activities are restricted only to implementation of the technology that is available in the market for manufacturing of products which we manufacture. Our quality assurance and quality control department has enabled us to expand our business in domestic market. Before a new product is manufactured in the plant premises, there is certain research that goes into its production. Below mentioned are certain points that explains the research that goes into its production:

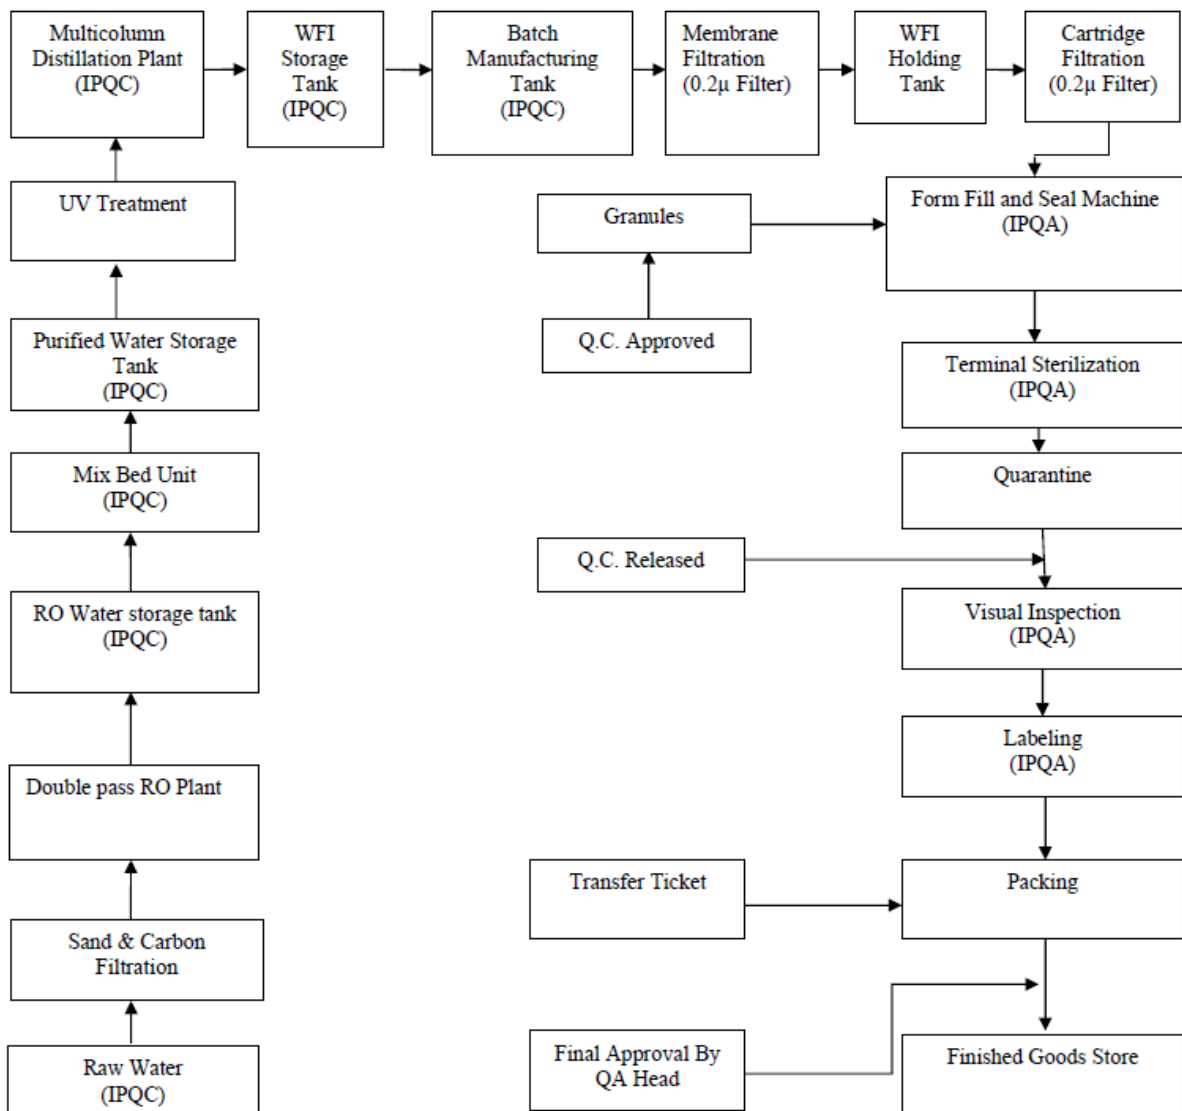

- a) Specific type of machine required for its production

- b) Specific temperature required for the storage of the drug powder if any
- c) To select for the specific vendor for the procurement of drug powder and other additives
- d) Testing guidelines as prescribed by the specific monograph for its specific testing
- e) Packing containers with specific sizes for the packaging of the finished goods
- f) Specific utilities for efficient running of the filling machines and other operations

FLOW CHART DRY SYRUP MANUFACTURING

Description of each stage of our manufacturing process:

A) Dry Injection (Single drug) Manufacturing

1. In the process flow of dry injection facility, we have to fill API in the sterilized glass vial, which is stoppered with the prewashed & sterilized rubber stoppers and sealed with the Aluminium F/O seal, these activities are done in the Aseptic condition. After that the sealed vials are visually inspected, labelled & finally packed.
2. During the process first we start with the Rubber stopper, the approved Rubber stopper after dispensing is transferred to autoclave room for washing & sterilization process into the bung processor. After completion of the sterilization, R. Stoppers unloads into the cooling zone in aseptic processing area for temporarily storage. During filling process these sterilized r. stoppers are transferred to the filling room through mobile LAF to plug on the vial.
3. After processing of the R. stoppers vials are processed online during the batch filling activity. i.e., the approved glass vials after dispensing, decartoned & inspected then transferred to the vial washing machine for washing. After vial washing process, the vials are undergoing through sterilization & dehydrogenation process, then after cooling API is filled into the vials.
4. In other side simultaneously, Approved API canister is dispensed from approved RM Store, through dynamic pass box after surface sanitization & UV treatment of the canister, unloads into the mobile LAF and transferred into the filling room. API canisters are temporally stored in the mobile LAF During processing API is charged into the Hopper of filling machine.
5. Also, the approved Aluminium F/O Seals as per BMR (colour of flip off) are dispensed from the warehouse and transferred to Autoclave room. Here, in autoclave Aluminium seals are sanitized and transferred to Aseptic processing area through Dynamic pass box after UV treatment. In aseptic area aluminium seals unloads and transferred to vial sealing room and charged into the hopper during the batch processing.
6. As per the calculated target filled weight API is filled in the sterilized vial with nitrogen purging, after nitrogen purging sterilized rubber stopper is plug in the vial and same is sealed with the aluminium seal this activity is done under the LAF in aseptic processing area.
7. After filling & sealing vials undergoes to visual inspection activity and the inspected good vials are labelled with the help of sticker labelling machine, the labelled vials are finally packed and transferred to the F.G Quarantine.

Sexual harassment includes one or more of the following acts or behaviour namely, physical contact and advances or a demand or request for sexual favours or making sexually coloured remarks, showing pornography or any other unwelcome physical, verbal or non-verbal conduct of sexual nature. Factories Act, 1948

The Factories Act, 1948 (the “Factories Act”) regulates the provisions relating to labour employed in factories. This Act defines a factory as any premises on which ten or more workers are employed or were employed on any day of the previous twelve (12) months, and on which a manufacturing process is being carried on with the aid of power, or a premises on which twenty or more workers are employed or were employed on any day of the previous twelve (12) months and on which a manufacturing process is carried on ordinarily without the use of power. The Factories Act provides for the health, safety, and welfare of all workers and requires that the ‘Occupier’ (defined as the person who has ultimate control over the affairs of the factory and in case of a company, any one of the directors) ensures that all the workers are within safe working conditions while they are in the factory, and are not exposed to any health risks and that they receive adequate instruction, training and supervision to ensure the same. The Factories Act also makes provisions relating to the employment of women and young persons (including children and adolescents), annual leave with wages, etc. The Factories Act requires an Occupier of a factory to obtain approval, license, and registration for running and qualifying as a factory under the Factories Act, by submitting the application along with plans and specifications to the State Government or the Chief Inspector. Unless this permission from the Chief Inspector is obtained, no building can be constructed or taken in use as a factory or a part of an existing factory. The Chief Inspector may, on receipt of the said application and on being satisfied that there is no objection to the grant of license applied for, register the factory and grant the license to the applicant to use as factory such premises as are specified in the application and subject to compliance with such conditions as are specified in the license. Any contravention of the provisions of the Factories Act or the rules framed thereunder may lead to imprisonment of the manager or the Occupier of the factory for a term up to two (2) years or with a fine of ₹ 100,000 or both, and in case of continuing contravention even after conviction, with a fine of up to ₹ 1,000 per day of contravention. In case of a contravention which results in an accident causing death or serious bodily injury, the fine shall be not less than ₹ 25,000 and ₹ 5,000 respectively. The employment of workers, depending on the nature of activity, is regulated by a wide variety of generally applicable labour laws. The following is an indicative list of labour laws which may be applicable to our Company due to the nature of our business activities:

Industries (Development and Regulation) Act, 1951

The Industries (Development and Regulation) Act, 1951 (the “Act”) governs the development and regulation of industries in India, and its main objective is to empower the Government to: (i) take necessary steps for the development of industries; (ii) regulate the pattern and direction of industrial development; and (iii) control the activities, performance and results of industrial undertakings in public interest. The Act is applicable to the ‘Scheduled Industries’ which have been listed down in the first schedule of the Act and small-scale industrial undertakings and ancillary units are exempted from the provisions of the Act. The Act regulated the industries by requiring them to obtain industrial licensing by filing an Industrial Entrepreneur Memoranda with the Secretariat of Industrial Assistance, Department of Industrial Policy and Promotion. This Act is administered by the Ministry of Industries and Commerce through its Department of Industrial Policy & Promotion. This department is responsible for the formulation and implementation of promotional and developmental measures for growth of the industrial sector and also monitors the industrial growth and production, in general, and selected industrial sectors. In addition to above, we are subject to a wide variety of generally applicable labour laws concerning condition of working, benefit and welfare of our labourers and employees such as the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 and the Employees’ (Provident Fund and Miscellaneous Provision) Act, 1952.

Industrial Employment (Standing Orders) Act, 1946

In order to strengthen the bargaining powers of the workers this act is enacted, it requires the employers to formally define the working conditions to the employee. As per this act, an employer is required to submit five copies of standing orders required by him for adoption of his industrial establishment. An employer failing to submit the draft standing orders as required by this act shall be liable to pay fine as per section 13 of this act.

Contract Labour (Regulation and Abolition) Act, 1970, as amended (the “CLRA Act”)

The CLRA Act requires the principal employer of an establishment in which twenty or more workmen are employed or were employed on any day of the preceding twelve months as contract labour, to make an application to the concerned officer for registration of the establishment. In the absence of registration, contract labour cannot be employed in the establishment. Likewise, every contractor who employs or who employed on any day of the preceding twelve months twenty or more workmen, is required to obtain a license and not to undertake or execute any work through contract labour except under and in accordance with the license issued. The CLRA Act imposes certain obligations on the contractor in relation to establishment of canteens, rest rooms, drinking water, washing facilities, first aid, other facilities and payment of wages. However, in the event the contractor fails to provide these amenities, the principal employer is under an obligation to provide these facilities within a prescribed time period. Penalties, including both fines and imprisonment, may be levied for contravention of the provisions of the CLRA Act.

Employees Provident Fund and Miscellaneous Provisions Act, 1952 (“Act”) and the schemes formulated there under (“Schemes”)

This Act provides for the institution of provident funds, family pension funds and deposit linked insurance fund for the employees in the factories and other establishments. Accordingly, the following schemes are formulated for the benefit of such employees:

- i. ***The Employees Provident Fund Scheme:*** As per this Scheme, a provident fund is constituted and both the employees and employer contribute to the fund at the rate of 12% (or 10% in certain cases) of the basic wages, dearness allowance and retaining allowance, if any, payable to employees per month.
- ii. ***The Employees Pension Scheme:*** Employees’ Pension Scheme is Pension Scheme for survivors, old aged and disabled persons. This Scheme derives its financial resource by partial diversion from the Provident Fund contribution, the rate being 8.33%. Thus, a part of contribution representing 8.33 per cent of the employee’s pay shall be remitted by the employer to the Employees’ Pension fund within 15 days of the close of every month by a separate bank draft or cheque on account of the Employees’ Pension Fund contribution in such manner as may be specified in this behalf by the appropriate authority constituted under the Act. The Central Government shall also contribute at the rate of 1.16 per cent of the pay of the members of the Employees’ Pension Scheme and credit the contribution to the Employees’ Pension Fund.
- iii. ***The Employees Deposit Linked Insurance Scheme:*** As per this Scheme, the contribution by the employer shall be remitted by him together with administrative charges at such rate as the Central Government may fix from time to time under Section 6C (4) of the Act, to the Insurance Fund within 15 days of the close of every month by a separate bank draft or cheque or by remittance in cash in such manner as may be specified in this behalf by the appropriate authority constituted under the Act.

Wherever the amount represented Rs '0.00' construes value less than Rupees Five Hundred.

2. Use of Estimates:

The preparation of financial statements in conformity with Indian GAAP requires management to make judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known materialized.

3. Going Concern Accounting Assumption:

The enterprise is normally viewed as a going concern, that is, as continuing in operation for the foreseeable future. It is assumed that the enterprise has neither the intention nor the necessity of liquidation or of curtailing materially the scale of the operations.

4. Property plant and equipments:

Items of property, plant and equipment are measured at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment comprises: (a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; (b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other cost directly attributable to bringing the item to working condition for its intended use.

The cost of improvements to leasehold premises, if recognition criteria are met, are capitalized and disclosed separately under leasehold improvement.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal and retirement of an item of property, plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset is recognized in Statement of profit and loss.

Subsequent cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with expenditure will flow to the Company and the cost of the item can be measured reliably. All other subsequent cost are charged to Statement of profit and loss at the time of incurrence.

5. Intangible Assets:

Intangible Asset is carried in the books, if it is an identifiable non-monetary asset, without physical substance, held for use in the production or supply of goods or services, for rental to others, or for administrative purposes.

An intangible asset is recognized if, and only if:

- a) It is probable that the future economic benefits that are attributed to the asset will flow to the company; and
- b) cost of the asset can be measured reliably.

The residual value shall not be higher than that prescribed in Part C of Second Schedule.

7. Impairment of Assets:

At each reporting date, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication of impairment. If any such indication of impairment exists, then the asset's recoverable amount is estimated. For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash generating units ('CGU').

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its estimated recoverable amount.

Impairment losses are recognized in the Statement of profit and loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU and then to reduce the carrying amounts of the other assets in the CGU on a pro-rata basis.

For other assets, an impairment loss is reversed only if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

8. Investments:

Long-term Investments are carried at cost. However, provision for diminution in value is made to recognize a decline, other than temporary, in the value of the investments.

Current Investments are carried at lower of cost or market value. The cost of securities sold is determined on the first-in-first-out (FIFO) method.

9. Borrowing Costs:

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is suspended during the extended period in which active development is interrupted. Other borrowing costs are charged to statement of profit and loss as and when incurred.

30 Disclosure pursuant to Accounting Standard - 15 'Employee Benefits' as notified u/s 133 of the Defined Benefit Plan:

The following are the types of defined benefit plans:

- a Gratuity Plan**
15 days salary for every completed year of service. Vesting period is 5 years and payment is restricted to Rs. 20 lacs. The present value of defined obligation and related current cost are measured using the Projected Unit Credit Method with actuarial valuation being carried out at each balance sheet date.

Risk Exposure
Through its defined benefit plans, the company is exposed to a number of risks, the most significant of which are detailed below:

Interest Rates Risk	The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase. Thus the plan exposes the Company to the risk of fall in interest rates. Some times, the fall can be permanent, due to a paradigm shift in interest rate scenarios because of economic or fiscal reasons. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability (as shown in financial statements). Even for funded schemes, a paradigm downward shift in bond yields may affect the reinvestment yields and may increase ultimate costs.
Salary Inflation Risk	The present value of the defined benefit plan is calculated with the assumption of salary escalation rate(SER), which is applied to find the salary of plan participants in future, at the time of separation Higher than expected increases in salary will increase the defined benefit obligation and will have an exponential effect.
Demographic Risk	Demographic assumptions are required to assess the timing and probability of a payment taking place. This is the risk of volatility of results due to unexpected nature of decrements that include mortality, attrition, disability and retirement. The effects of this decrement on the DBO depend upon the combination salary increase, discount rate, and vesting criteria and therefore not very straight forward. It is important not to overstate withdrawal rate because the cost of retirement benefit of a short serving employees will be less compared to long service employees.
Actuarial Risk	It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons: Adverse Salary Growth Experience: Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected. Variability in mortality rates: If actual mortality rates are higher than assumed mortality rate assumption than the Gratuity benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cash flow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate. Variability in withdrawal rates: If actual withdrawal rates are higher than assumed withdrawal rate assumption than the Gratuity benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date.
Liquidity Risk	This is the risk that the Company is not able to meet the short-term gratuity pay outs. This may arise due to non availability of enough cash / cash equivalent to meet the liabilities or holding of ill liquid assets not being sold in time. Employees with high salaries and long durations of service or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign / retire from the company there can be strain on the cash flows.
Asset Liability Mismatch	This will come into play unless the funds are invested with a term of the assets replicating the term of the liability
Market Risk	Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits & vice versa. This assumption depends on the yields on the corporate / government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.
Legislative Risk/Regulatory Risk	Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation / regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation. The new labour code is a case in point. And the same will have to be recognized immediately in the year when any such amendment is effective.

g **Sensitivity Analysis**

The sensitivity analyses below have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period. Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

Particulars	Gratuity (31.05.2024)			Gratuity (31.03.2024)		
	% Increase in Defined Benefit Obligation	Liability	Increase / Decrease in Defined Benefit Obligations	% Increase in Defined Benefit Obligation	Liability	Increase / Decrease in Defined Benefit Obligations
Effect on DBO due to 0.5% increase in Discount Rate	-3.45%	52.95	(1.89)	-3.42%	52.81	(1.87)
Effect on DBO due to 0.5% decrease in Discount Rate	3.68%	56.85	2.02	3.65%	56.68	2.00
Effect on DBO due to 0.5% increase in Salary Escalation Rate	3.72%	56.88	2.04	3.70%	56.70	2.02
Effect on DBO due to 0.5% decrease in Salary Escalation Rate	-3.52%	52.91	(1.93)	-3.49%	52.77	(1.91)

Particulars	Gratuity (31.03.2023)			Gratuity (31.03.2022)		
	% Increase in Defined Benefit Obligation	Liability	Increase / Decrease in Defined Benefit Obligations	% Increase in Defined Benefit Obligation	Liability	Increase / Decrease in Defined Benefit Obligations
Effect on DBO due to 0.5% increase in Discount Rate	-3.35%	47.43	(1.65)	-3.43%	41.37	(1.47)
Effect on DBO due to 0.5% decrease in Discount Rate	3.58%	50.84	1.76	3.67%	44.41	1.57
Effect on DBO due to 0.5% increase in Salary Escalation Rate	3.63%	50.86	1.78	3.72%	44.43	1.59
Effect on DBO due to 0.5% decrease in Salary Escalation Rate	-3.43%	47.39	(1.68)	-3.51%	41.34	(1.50)

While one of the parameters mentioned above is changed by 50 basis points, Other parameters are kept unchanged for evaluating the DBO. Further, Sensitivities due to mortality & withdrawals have been considered as not material & hence impact of change due to these not calculated. Sensitivities as rate of increase of pensions in payment, rate of increase of pensions before retirement & life expectancy are not applicable

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure

to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

- c) Phase III/T+3: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023 vide T+3 Press Release. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Press Release as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue, it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Anchor Investors are not allowed to withdraw their Bids after Anchor Investors bidding date.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular. The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any ‘fit and proper/due diligence’ requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines.
