- 3. Our Company operates in a constantly evolving VFX market, which is subject to rapidly changing client's behaviour and tastes and depends on the acceptance of content by the audience through which the Company gains the long-term popularity of its name.***

Our Company operates in the entertainment industry which involves a substantial degree of risk, including as a result of rapidly evolving changes in technology, digital content platforms and consumer tastes, The Company requires it to quickly react to changing technologies, market dynamics and client's behaviour and preference. In particular, the convergence of high-definition portable devices, high-speed wireless internet and complementary digital content services, all of which are becoming widely available and more affordable, has created a market in which customers can watch their favourite shows when, how and where they want. As a result, the industry has seen high demand for OTT content, which has resulted in increased opportunities for VFX services providers. The Company's success at winning opportunities to provide VFX services for content producers depends on our ability to effectively adapt its services to the changes, content producers develop in response to evolving consumer preferences. If we fail to keep pace with its customers' needs or fail to respond to changes in technology, we may be unable to compete effectively which could have a material adverse effect on our business, financial condition, cash flow and results of operations.

- 4. Our ability to remain competitive may be adversely affected by rapid technological changes and our ability to access such technology.***

The Indian media and entertainment industry continues to undergo significant technological developments. We may not be successful in adopting new visual effect methods or may lose market share to our competitors if the methods that we adopt are not as technologically sound, user-friendly, widely accessible or appealing to customers as those adopted by our competitors. Further, advances in technologies or alternative methods or changes in client’s behaviour driven by these or other technologies, could have a negative effect on our business. Other competitor companies may have greater financial strength to adopt new growing technological trends ahead of us. In order to remain competitive, we could be required to upgrade our technology, and any failure to do so could have a material adverse effect on our business, prospects, financial condition and results of operations.

- 5. We operate in an industry which is highly sensitive with regards to maintenance of secrecy of the projects and its contents. Any failure on our part to maintain secrecy of our projects, will have an adverse effect on our results of operations and financial condition.***

We operate in an industry which is highly sensitive with regards to maintenance of secrecy of the projects and its contents. We have in place firewall, security systems and procedures to protect the projects and its contents. Piracy of project content, its information, digital effects including internet piracy and the sale of counterfeit consumer products, may decrease revenue from the exploitation of our products. Any failure on our part to maintain secrecy of our projects, will have an adverse effect on our results of operations and financial condition.

- 6. We depend on our relationships with production house and film directors and other industry participants to exploit our film content.***

We generate projects through our relationship with production house and films directors and other industry participants. Our failure to maintain these relationships, or to establish and capitalise on new relationships, could harm our business or prevent our business from growing, which could have a material adverse effect on our business, prospects, financial condition and results of operations.

- 7. Success is dependent on our people. Our ability to attract and maintain qualified technical personnel, will affect the results of operations and financial condition.***

As on April 30 2024 we have 105 employees. We are dependent on significant number of our employees who are skilled and due to the limited pool of available skilled personnel, we face strong competition to recruit and retain skilled and professionally qualified staff. Our continued future success also depends upon our ability to recruit and retain a large group of experienced professionals and staff. The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of experienced personnel could have a material adverse effect on our operations and profitability. Our ability to retain experienced staff members as well as senior management will in part depend on our maintaining appropriate staff remuneration and incentive schemes in accordance with the prevailing private sector industry standards. We cannot assure you that the remuneration and incentive schemes we have in place will be sufficient to retain the services of our senior management and skilled employees.

8. *The Restated Financial Statements have been provided by Peer Reviewed Chartered Accountants who is not Statutory Auditor of our Company.*

The Restated Financial Information of our Company as disclosed in section titled “Restated Financial statements” beginning on Page no. 158 of this Draft Red Herring Prospectus for the Financial Year ended on March 31, 2024, for the period ended July 10, 2023 and for the Financial Years ended on March 31, 2023 and March 31, 2022 are provided by Peer Reviewed Chartered Accountants i.e., M/s. Vinay Bhushan & Associates, Chartered Accountants (having Peer Review Registration No. 015503) who is not the Statutory Auditor of our Company.

9. *Intensified competition may restrict our ability to access content and/or talent.*

We face intense competition from Indian competitors, many of which are substantially larger and have greater financial resources than us. Growth in entertainment industry in recent years has attracted new industry participants and competitors. The entry of such competitors may change the media and entertainment industry in ways that may not favour us. Domestic competitors of a scale similar to or greater than our own may impact our ability to attract creative and technical talent and other scarce resources including content, which could have a material adverse effect on our business, prospects, financial condition and results of operations.

10. *Certain relevant copies of educational qualification of one of our Promoter and Executive Director is not traceable.*

Relevant copies of education qualification of one of our Promoter and Executive Director, Ms. Deepa Shailendra Chandgothia is not traceable. We can't assure you that the back-ups for the relevant copies of educational qualifications will be available in a timely manner or at all.

11. *Our inability to adapt to rapidly changing post production technology in a timely manner or at all may adversely affect our profitability and results of operation.*

We have an in-house digital post-production studio which provides services such as digital intermediate processing, film restoration, format conversions among others. Also, our equipment is prone to rapid changes in technology. We may not be able to adapt to such changes in a timely manner or at all. In order to remain competitive, we could be required to upgrade our technology, and any failure to do so could have a material adverse effect on our business prospects, financial condition and results of operations.

12. *Our success depends largely upon the services of our Promoters and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain them may adversely affect the operations of our Company.*

Our Company and our Promoters have built relations with clients and other persons who are connected with our business. Further, our Key Managerial Personal also possesses the requisite domain knowledge to provide efficient services to our clients. Accordingly, our Company's performance is dependent upon the services of our Promoters and other Key Managerial Personnel. Our future performance will, therefore, depend upon the continued services of these persons. It is possible that we may lose our skilled and trained staff to our competitors and high attrition rates in particular could result in a loss of domain and process knowledge. Demand for key managerial personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

13. *If we are unable to attract new clients or our existing clients do not renew their contract, the growth of our business and cash flows will be adversely affected.*

Our top five customers contributed approximately Rs. 1,277.83 Lakhs i.e. 58.14% and Rs. 358.08 Lakhs i.e. 64.20% of our revenue from operations based on Restated Financial Statements for the period July 11, 2023 to March 31, 2024 and for the period ended July 10, 2023. To increase our revenue and cash flows, we must regularly add new clients. If we are unable to generate sufficient sales leads through our marketing programs, or if our existing or new clients do not perceive our services to be of sufficiently high value and quality, we may not be able to increase sales and our operating results would be adversely affected. In addition, our existing clients have no obligation to repeat contracts / award new projects to us due to various factors including clients' satisfaction with our services, acceptance of our creative work by the viewers, changing preference of viewers, our prices and the prices of competing service providers. If we fail to achieve repetitive projects from existing clients or to add new clients, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

- 14. *There have been some instances of incorrect filings/non-compliances/delay in filings with certain statutory authorities, In the event we are found not to be in compliance with any applicable regulations in relation to the regulatory filings or corporate actions, we may be subject to regulatory actions or penalties for any such possible incorrect filings/non-compliances/delay in filings and our business, financial condition and reputation may be adversely affected.***

There have been some instances of incorrect filings/ non-compliances/ delay in filings with certain statutory authorities with certain provision of statutory regulations applicable to us such as:

- Non-compliance as to first appointment as an Additional Director of Mr. Parish Tekriwal.
- Clerical error in mentioning Rs. 3,00,000 as the remuneration of Managing Director, Mr. Parish Tekriwal at the time of appointment in the Board Resolution.

While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance or instances of non-filings or incorrect filings in statutory forms with the RoC as of the date of this Draft Red Herring Prospectus, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by concerned regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

- 15. *We intend to utilise a portion of the Net Proceeds for funding our Capital Expenditure for purchase of certain equipment and software. We are yet to place orders for such Equipment.***

We intend to use a part of the Net Proceeds towards purchase of certain equipment and Software for expansion at our existing premises at 701, 7th Floor, 901, 9th Floor, Sapphire Building, Junction of S.V. Rd & 1st Rd, Khar (W), Khar Colony, Mumbai - 400052, and Office No. 1306 and 1307, 13th Floor and Office No. 1405, 14th Floor Lotus Link Square, New Link Road, D N Nagar, Andheri, Mumbai – 400053 for property details, see chapter titled “Our Business”. While we have obtained quotations from different vendors in relation to the equipment required for funding such capital expenditure, we are yet to place orders for such equipment. Our Company intends to utilise ₹ 803.76 Lakhs from the Net Proceeds to purchase equipment. Our Company is further subject to risks on account of inflation in the price of equipment. Since the funding for the equipment is from the IPO proceeds, any delay in access to IPO proceeds may eventually delay the process of placing the orders. The purchase of equipment would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may be a possibility of delay at the supplier’s end in providing timely delivery of these machineries, which in turn may delay the implementation of our expansion plan. Further, the quotations relied upon by us in arriving at the total cost of machineries, are valid for a specific period and may lapse after the expiry of the specific period. Consequent upon which, there could be a possible escalation in the cost of equipment and software proposed to be acquired by us at the actual time of purchase, resulting in increase in the project cost, which may result in cost overruns, and may affect our profitability. For further details read section “Objects of the Issue” beginning on page 70 of the Draft Red Herring Prospectus.

- 16. *We have been recently converted as a Company and any non-compliance with the provisions of Companies Act, 2013 and any provisions, rules and regulation under any other Act may attract penalties against our Company which could impact our financial and operational performance and reputation.***

Our Company has been converted on June 01, 2023, pursuant to conversion of Limited Liability Partnership firm into company. The provisions of the Companies Act were not applicable to us earlier. However, consequent to the aforesaid conversion, our Company is subject to compliance of various provisions of the Companies Act such as filing of relevant RoC forms. Further since our company got recently converted from Limited Liability Partnership, though our Company will endeavour to take all possible steps to comply with the provisions of the Companies Act and other applicable regulations, but in case of our inability to do so or in case of any delay, we may be subject to penal action from the appropriate authorities which may have an adverse effect on our financial and operational performance and reputation.

- 17. *Our Registered Office and studio office are not owned by us. In the event we lose such rights, our business, financial condition and results of operations and cash flows could be adversely affected.***

Our registered office situated at 701, 7th Floor, Sapphire Building, Junction of S.V. Rd & 1st Rd, Khar (W), Khar Colony, Mumbai 400052, Maharashtra, India is not owned by us and is taken on lease basis from Mr. Amit Daulat Lalvani and Mr. Parkash Kumar Manwani for a period of 60 months commencing from October 01, 2022 and expiring

on September 30, 2027. Further, our studio offices are situated at multiple locations in Maharashtra which are all taken on lease basis. Further, we cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. For further details, see section “Our Business” beginning on page 106 of this Draft Red Herring Prospectus. If we are required to vacate the current premises’, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

18. *Our Company in the usual course of Business does not have any long-term contracts with its customers and we rely on the invoice for our services and our customers may cancel or modify their orders, delay or change their sourcing strategy. Loss of one or more of our top clients or a reduction in their demand for our services or reduction in revenue derived from them may adversely affect our Business, Results of Operations and Financial Condition.*

Our Company has in the past received repeat businesses from our customers and they continue to engage with us, however we do not enter into long-term contracts with our customers and we rely on invoices which govern the volume and other terms of our sale of services to them. Many of the service orders we receive from our customers specify pricing terms and the delivery schedule. Absence of any long-term contracts or contractual exclusivity with respect to our Business Arrangements with such clients poses a challenge on our ability to continue to supply our products to these Customers in future.

We may possibly experience issues executing a service order from a customer in accordance with the requirements of them on a timely basis. Additionally, our customer has certain specific requirements for service quality as well as delivery schedules and any failure to meet our customers’ expectations and specifications could result in cancellation of orders or the risk of the customer not providing subsequent orders. Due to the possibility of orders not being placed, cancellations or changes in scope and schedule of orders, which is typically at the discretion of our customers, or problems we encounter in order of execution or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent an order will be performed or that service orders will be, in one period as consistently as they have been in prior periods. Any delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default in regard to any other uncompleted orders, or disputes with clients in respect of any of the foregoing, could materially affect our Cash Flow Position, Revenues and Earnings.

19. *We have incurred indebtedness. In addition, certain of our financing agreements involve variable interest rates and an increase in interest rates may adversely affect our results of operations and financial condition.*

Our company operates in the industry which is capital intensive in nature, and we fund a large part of our operations through financing from banks. As on March 31, 2024, we had total financial indebtedness of ₹ 556.02 Lakhs. For further information on our secured borrowings, see “Financial Indebtedness” on page 161 of this Draft Red Herring Prospectus. We usually finance our working capital requirements mainly through our internal accruals and arrangements with banks. Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows and our capacity to service debt in a rising interest rate environment. If our future cash flows from operations and other capital resources are insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments.

Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. We are susceptible to changes in interest rates and the risks arising therefrom. Certain of our financing agreements provide for interest at variable rates and the lenders are entitled to charge the applicable rate of interest, which is a combination of a base rate/MCLR rate that depends upon the policies of the RBI and a contractually agreed spread. Further, in recent years, the GoI has taken measures to control inflation, which included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows, and financial condition.

Further, if the Company fails to fulfill the conditions of loan arrangement with few or all of the Banks or Financial Institution then it will substantially affect our reputation in the industry which may result in losing the major Customers, As on the date of the Draft Red Herring Prospectus, we have not received NOC for the Issue from one of our secured lender.

20. *The knowledge and experience of certain present promoters of our Company is limited in VFX Industry.*

The knowledge and experience of certain present promoters of our Company is limited in VFX Industry. Their experience in managing and being instrumental in the growth of our Company is limited to the extent of their knowledge and experience in this industry and we cannot assure that this will not affect our business growth. Although our Promoters, Directors and key managerial personnel, Mr. Shailendra Ishwardas Chandgotia, Ms. Deepa Shailendra Chandgotia and Ms. Pooja Shailendra Chandgotia have experience of around 3 years. For further details of our directors and key managerial personnel, please refer chapter titled “Our Management” beginning on Page 135 of this Draft Red Herring Prospectus.

21. *We are subject to strict quality requirements and any service deficiency or any failure by us to comply with quality standards may lead to the cancellation of existing and future orders, recalls and exposure to potential service liability claims, warranty claims and other disputes.*

We face an inherent business risk of exposure to service deficiency. We may not be able to meet regulatory relevant quality standards in India, or the quality standards imposed by our customers which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We are a TPN certified VFX provider. TPN (Trusted Partner Network), owned and managed by the Motion Picture Association (MPA) in USA, is a global, industry-wide film and television content protection initiative. The TPN helps companies prevent leaks, breaches, and hacks of their customers' movies and television shows prior to their intended release and seeks to raise security awareness, preparedness, and capabilities within the industry. Partners who pass an independent assessment conforming to these industry best practices are listed as “trusted partners” in the TPN directory. TPN assessment is well acknowledged by big studios like Walt Disney Studios, Universal City Studios, Warner Bros., Netflix Studios and so forth. If any of our services do not meet regulatory standards or are deficient, we may be, inter alia responsible for damages relating to any service deficiency, required to recall or redesign such service or and incur significant costs to defend any such claims, which could have an adverse impact on our company’s business operations and financial condition of the company.

22. *In case of any inability arise to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our sales channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or marketing agents will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market conditions and other data or the strategies that we may use in future will be successful under various market conditions.

23. *Failure to deal effectively with fraudulent activities on emails would increase our fraud losses and harm our business and could severely diminish seller and customer confidence in and use of our services.*

We face risks with respect to fraudulent activities on our emails. Although we have implemented measures to detect and reduce the occurrence of fraudulent activities, scams, including encouraging reporting of concerns, gating and monitoring higher-risk activities, evaluating sellers on the basis of their transaction history, and restricting or suspending some sellers, we cannot assure you that these measures will be effective in combating fraudulent transactions or improving overall satisfaction among customers. We will need to evolve to combat fraudulent activities as they develop. Any failure to evolve could result in loss of customer trust. At the same time, the implementation of additional measures to address fraud could negatively affect the attractiveness of our offerings to customers, or create friction in our customers’ experience.

24. *Our Company has availed certain unsecured loan which can be recalled at any time.*

Our Company has availed certain unsecured loan amounting to ₹ 19.00 Lakhs as on March 31, 2024. The unsecured loan taken by our Company from Related Parties may be recalled at any time. Though our Company intends to repay the loan amount in near future, sudden recall may disrupt our operations and also may force us to find alternative sources of financing, which may not be available on commercial reasonable terms or at all. opt for funding at higher interest rates, resulting in higher financial burden. We may not have adequate working capital to meet business requirements of our Company, and, as a result, any such demand by the lenders may affect our business, cash flows, financial condition and results of operations. Further, in respect of such unsecured loan, no proper agreement has been

executed between the parties. For further details, please refer to the section “*Financial Indebtedness*” beginning on page no. 161 of this Draft Red Herring Prospectus.

- 25. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and we have not entered into any definitive arrangements to utilize the Net Proceeds of the Issue and the Objects have not been independently appraised by a bank or a financial institution. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.***

We intend to use the Net Proceeds of the Issue for the purposes described in the section titled “*Objects of the Issue*” on page 70. The Objects of the Issue are: a) Funding of capital expenditure requirements of our Company towards purchase of equipment and Software b) Repayment/prepayment of all or certain of our borrowings availed by our Company; c) General Corporate Purposes.

The Objects of the Issue have not been appraised by any bank or financial institution, and certain our funding requirement is based on current conditions, internal estimates and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of our industry, we may have to revise our business plan and/or management estimates from time to time and consequently our funding requirements may also change. Such internal estimates may differ from that of any third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws. In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements, and may have an adverse impact on our business, results of operations, financial condition and cash flows. Accordingly, investors in the Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds. Further, pursuant to Section 27 of the Companies Act, any variation in the Objects of the Issue would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Issue, at such price and in such manner in accordance with applicable law.

- 26. *There may be potential conflicts of interest if our Promoters or Directors get involved in any business activities that compete with or are in the same line of activity as our business operations.***

In the past, our promoter was engaged in other business having object similar to the line of business of our Company, however, at present our Promoter is not engaged with that Company, Also, we have not entered into Non-Compete agreement with our Promoters or directors and there can be no assurance that our Promoter or members of the Promoter Group or directors will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

- 27. *Our name and logo are not registered as on current date. In case of no registration, our brand building efforts may be hampered which might lead to an adverse effect on our business.***

We have made application dated December 02, 2023 for registration of our Logo/trademark under the Trademarks Act, 1999 for getting the same registered. In case of no registration, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks. This could have a material adverse effect on our business, which in turn could adversely affect our results of operations.

For further details, please refer "Intellectual Property" under chapter "Our Business" on page 106 of this Draft Red Herring Prospectus.

- 28. *We have entered into and may enter into related party transactions in the future also.***

Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may affect our competitive edge. Our Company had entered into various transactions with our Promoter, Promoter Group, Directors and their Relatives. These transactions, inter-alia includes Sales of services, Contractual expenses, Interest Expenses, Salary expenses, Director’s remuneration etc. The Percentage of total related party transaction to total revenue is 13.43 %, 8.47 %, 20.59 % and 145.00 % for the period July 11, 2023 to March 31, 2024, for the period ended July 10, 2023 and for the year ended on March 31, 2023 and 2022 Respectively, and Our Company entered into such transactions are at arm length price due to easy proximity and quick execution. Also, the transactions are in compliance with Companies Act, 2013 and other applicable provisions. While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more

favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise.

29. *Certain of our Promoters may be interested in us other than in terms of remuneration and Loan accepted or loan repaid, and this may result in conflict of interest with us.*

In future certain of our Promoters may be interested in us, in addition to regular remuneration or benefits and Loans accepted or loans repaid, to the extent of their shareholding, direct and indirect, and benefits arising therefrom. Our Promoters are also interested in us to the extent of their shareholding in us and any other benefits that may arise from the shareholding therefrom. We cannot assure you that our Promoters will exercise their rights as shareholders to our benefit and best interest.

30. *Our Promoters will be able to exercise significant influence and control over us after the Issue and may have interests that are different from or conflict with those of our other shareholders.*

As on the date of this Draft Red Herring Prospectus, our Promoters hold 93.02% of the paid-up Equity Share capital of our Company. Post-Issue, the Promoters will continue to collectively hold substantial shareholding in our Company. For details of their shareholding pre and post-Issue, see “*Capital Structure*” on page 60. By virtue of their shareholding, our Promoters will have the ability to exercise significant control and influence over our Company and our affairs and business, the timing and payment of dividends, the adoption of and amendments to our Memorandum and Articles of Association, the approval of a merger or sale of substantially all of our assets and the approval of most other actions requiring the approval of our shareholders. The interests of our Promoters may be different from or conflict with our interests or the interests of our other shareholders in material aspects and, as such, our Promoters may not make decisions in our best interests.

31. *Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●]% of the Issue Proceed.*

As on date we have not identified the use of such funds. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●] % of the Issue Proceed. We have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act. For details, please refer the chapter titled “*Objects of the Issue*” beginning on Page No. 70 of this Draft Red Herring Prospectus.

32. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company subject to the applicable laws and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

33. *Our success largely depends upon our ability to attract and retain our Promoters, Directors, Key Managerial personnel and Senior Management with technical expertise. Our inability to attract and retain them and other personnel with technical expertise could adversely affect our business, financial condition and results of operations.*

Our success largely depends upon our ability to attract and retain our Promoters, Directors, Key Managerial personnel and Senior Management with technical expertise. Our inability to attract and retain them and other personnel with technical expertise could adversely affect our business, financial condition and results of operations. There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further information, see “*Our Management*” on page 135 of this Draft Red Herring Prospectus.

34. *We have taken guarantees from our directors in relation to Debt Facilities provided to us.*

We have taken guarantees from our directors in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Financial Indebtedness*” beginning on page 161 of this Draft Red Herring Prospectus.

35. *We may not be fully insured for all losses we may incur.*

Although we attempt to limit and mitigate our liability for damages arising from negligent acts, errors or omissions through contractual provisions, limitations of liability set forth in our contracts may not be enforceable in all instances or may not otherwise protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. We have taken various insurance policies, details of which is mentioned in the section titled, “*Insurance*” under the chapter titled, “*Our Business*” on page 106 of the Draft Red Herring Prospectus. Although we believe that we have adequate insurance coverage but that coverage may not continue to be available on reasonable terms or to be available in sufficient amounts to cover one or more large claims, and our insurers may disclaim coverage as to any future claim. Insurance coverage may be an inadequate remedy where the loss suffered is not easily quantifiable, for example, in the event of severe damage to our reputation. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

36. *Failure or disruption of our IT, automation systems may adversely affect our business, financial condition and results of operations.*

We have implemented various information technology (“IT”) systems to cover key areas of our operations, procurement and accounting. These systems are potentially vulnerable to damage or interruption from a variety of sources, which could result from (among other causes) cyber-attacks on or failures of such infrastructure or compromises to its physical security, as well as from damaging weather or other acts of nature. A significant or large-scale malfunction or interruption of one or more of our IT systems or automation systems could adversely affect our ability to keep our operations running efficiently and affect our services. In addition, it is possible that a malfunction of our data system security measures could enable unauthorized persons to access sensitive business data, including information relating to our intellectual property or business strategy or those of our customers. While we have not faced significant disruptions in past, any such malfunction or disruptions in future could cause economic losses for which we could be held liable or cause damage to our reputation. Any of these developments, alone or in combination, could have a material adverse effect on our business, financial condition and results of operations. Further, unavailability of, or failure to retain, well trained employees capable of constantly servicing our IT and automation systems may lead to inefficiency or disruption of our operations and thereby adversely affecting our business, financial condition and results of operations.

37. *Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders’ investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 157 of this Draft Red Herring Prospectus.

38. *Employee misconduct including misuse of confidential data and failure to maintain confidentiality of information could harm us and is difficult to detect and deter.*

We could be harmed by employee misconduct if our customers’ confidential information is misappropriated by us or our employees, our customers may consider us liable for that act and seek damages and compensation from us, in addition, to seeking termination of the contract. While there have been no instances during the last three financial year

of information technology breach or instances of cyber-attack, assertions of misappropriation of confidential information or the intellectual property of our customers against us, if successful, could have a material adverse effect on our business, financial condition and results of operations. Even if such assertions against us are unsuccessful, they may cause us to incur reputational harm and substantial cost.

Although we closely monitor our employees, misconduct, including acts of bribery, corruption or fraud by employees or executives, such acts could include binding us to transactions that exceed authorized limits or present unacceptable risks, or they may hide unauthorized or unlawful activities from us, which may result in substantial financial losses and damage to our reputation and loss of business from our customers. Employee or executive misconduct could also involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious reputational or financial harm, including harm to our brand. While we have not experienced any such employee misconduct in the past, it is not always possible to deter employee or executive misconduct and the precautions taken and systems put in place to prevent and detect such activities may not be effective in all cases. Any instances of such misconduct could adversely affect our business and our reputation.

39. *Industry information included in this Draft Red Herring Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although, we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

ISSUE RELATED RISKS

40. *An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.*

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

41. *The determination of the Price Band is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange.*

The determination of the Price Band is based on various factors and assumptions, and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the Issue Price of our Equity Shares has been determined by book building method. These will be based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 79 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares upon listing on the Stock Exchange. The price of our Equity Shares upon listing on the Stock Exchange will be determined by the market and may be influenced by many factors outside of our control.

42. *Our Promoter’s average cost of acquisition of Equity Shares in our Company could be lower than the Issue Price to be decided by the Company in consultation with the Book Running Lead Manager*

Our Company had issued 1,01,00,000 equity shares at a price lower than the Issue Price pursuant to conversion of our erstwhile limited liability partnership firm to Company pursuant to the provisions of Chapter XXI of the Companies Act 2013 also our Company had issued 1,14,00,000 equity shares at a price lower than the Issue Price pursuant to allotment of 60,00,000 Rights shares allotted on September 08, 2023, 39,00,000 Rights shares allotted on September 30, 2023 and 15,00,000 Rights shares allotted on February 08, 2024 in the last 12 months which may be at lower than the Issue Price. The Equity Shares allotted to shareholders pursuant to this Issue may be priced significantly higher

due to various reasons including better performance by the Company, better economic conditions and passage of time. For further details, see “*Capital Structure*” on page 60 of this Draft Red Herring Prospectus. The prices at which Equity Shares have been issued by us in last one year should not be taken to be indicative of the Issue Price and the trading price of our Equity Shares after listing.

- 43. *Our Equity Shares have never been publicly traded, and may experience price and volume fluctuations following the completion of the Issue. Further, our Equity Shares may not result in an active or liquid market and the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.***

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for our Equity Shares will develop or, if developed, does not guarantee the liquidity of such market for the Equity Shares. Investors might not be able to rapidly sell the Equity Shares at the quoted price if there is no active trading in the Equity Shares. The Issue Price of the Equity Shares has been determined by our Company in consultation with the BRLM through the Book Building Process. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 44. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the NSE Emerge in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the NSE Emerge. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 45. *Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoter or other shareholders may adversely affect the trading price of the Equity Shares.***

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

- 46. *There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder’s ability to sell for the price at which it can sell, equity shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 47. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares***

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding Rs.1,00,000, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long gains tax in India.

Term capital The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a

depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a nondelivered basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2024 and the Finance Act, 2024 received assent from the President of India on February 15, 2024. There is no certainty on the impact that the Finance Act, 2024 may have on our business and operations or in the industry we operate in.

48. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our restated financial statements, including the financial statements provided in this Draft Red Herring Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled "*Presentation of Financial Industry and Market Data*" beginning on Page 17 of this Draft Red Herring Prospectus.

Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited. India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("**IFRS**"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards, i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

49. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

EXTERNAL RISKS

50. *A slowdown in economic growth in India could cause our business to suffer.*

Our performance and the growth of our business are necessarily dependent on the health of the overall Indian economy. Any slowdown or perceived slowdown in the Indian economy or future volatility in global commodity prices could adversely affect our business. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could also adversely affect our business, financial condition, results of operations and prospects.

India's economy could be adversely affected by a general rise in interest rates or inflation, adverse weather conditions affecting agriculture, commodity and energy prices as well as various other factors. A slowdown in the Indian economy could adversely affect the policy of the GOI towards our industry, which may in turn adversely affect our financial performance and our ability to implement our business strategy.

The Indian economy is also influenced by economic and market conditions in other countries, particularly emerging market conditions in Asia. A decline in India's foreign exchange reserves and exchange rate fluctuations may also affect liquidity and interest rates in the Indian economy, which could adversely impact our financial condition. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect the Indian economy, which could materially and adversely affect our business, financial condition, results of operations and prospects.

Further, other factors which may adversely affect the Indian economy are scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our expansions; volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges; changes in India's tax, trade, fiscal or monetary policies, like application of GST; political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries; occurrence of natural or man-made disasters; infectious disease outbreaks or other serious public health concerns; prevailing regional or global economic conditions, including in India's principal export markets; and other significant regulatory or economic developments in or affecting India or its financial services sectors.

51. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

52. *Our business is affected by global economic conditions, especially in the geographies we cater to, which may have an adverse effect on our business, financial condition, results of operations and prospects.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Financial turmoil in Asia, U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors'

reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Financial disruptions may occur again and could harm our business, financial condition and results of operations.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Financial markets and the supply of credit could continue to be negatively impacted by ongoing concerns surrounding the sovereign debts and/or fiscal deficits of several countries in Europe, the possibility of further downgrades of, or defaults on, sovereign debt, concerns about a slowdown in growth in certain economies and uncertainties regarding the stability and overall standing of the European Monetary Union.

A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian financial markets and indirectly in the Indian economy in general. Any worldwide financial instability could influence the Indian economy. In response to such developments, legislators and financial regulators in the United States, Europe and other jurisdictions, including India, have implemented several policy measures designed to add stability to the financial markets. In addition, any increase in interest rates by the United States Federal Reserve will lead to an increase in the borrowing costs in the United States which may in turn impact global borrowing as well. Furthermore, in several parts of the world, there are signs of increasing retreat from globalization of goods, services and people, as pressure for the introduction of a protectionist regime is building and such developments could adversely affect Indian exports. However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current adverse conditions in the global credit markets continue or if there is any significant financial disruption, this could have an adverse effect on our business, financial condition and results of operations.

In February 2022, hostilities between Russia and the Ukraine commenced, which has led stock, commodities and foreign exchange markets worldwide to fluctuate. In addition, the market price of oil has risen sharply since the commencement of hostilities in the Ukraine, which may have an inflationary effect in India and other countries. A prolonged war or a protracted period of hostilities in the Ukraine may lead to global economic disturbances.

If we are unable to successfully anticipate and respond to changing economic and market conditions, our business, financial condition, results of operations and prospects may be adversely affected.

53. *Changing regulations in India could lead to new compliance requirements that are uncertain.*

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements.

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, financial condition, results of operations and prospects.

54. *Natural calamities, climate change and health epidemics could adversely affect the Indian economy and our business, financial condition, and results of operations. In addition, hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect our business, financial condition and results of operations.*

Our business activities may be damaged or disrupted as a result of natural calamities. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our Senior Management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our facilities. Any of the above factors may adversely affect our business, financial condition and results of operations.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

55. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is crucial to determine one's purchasing power. In other words, inflation is a measure that causes the prices of both goods and services to rise over time and buyers will feel the pinch as it affects their personal finance, particularly spending and buying habits. Any factor that causes prices of goods and services to rise in the market and create instability in consumption leads to inflation. There are two indices that are used to measure inflation in India — the consumer price index (CPI) and the wholesale price index (WPI). These two-measure inflation on a monthly basis taking into account different approaches to calculate the change in prices of goods and services.

India's retail inflation, which is measured by the consumer price index (CPI), eased to 5.02% in Sep. 2023, from 6.83% in Aug. this year, according to the latest data from the Ministry of Statistics and Programme Implementation. In the last two years, CPI hit the highest of 7.79% in April 2022, and the lowest of 4.06% in Jan. 2021. The Wholesale Price Index (WPI), which calculates the overall prices of goods before selling at retail prices, is at (-)0.52% in Aug., (-)1.36% in July 2023, (-)4.12% in June, (-)3.48% in May, and (-)0.92% in April 2023.

India's retail inflation eased to a three-month low of 5.02% in Sep. 2023. The CPI reading continues to cross the Reserve Bank of India's upper tolerance medium-term target of 4% within a band of 4+/- 2%. The RBI projects the headline inflation or the CPI at 5.4% for 2023-24. The real GDP growth is projected at 6.5% with Q1 at 8.0% during the period. Meanwhile, the Sep. 2023 inflation in the U.S. suggests that the consumer price index increased 3.7% year-over-year. The nation's GDP accelerated to 2.1% in the second quarter. Although the RBI has enacted certain policy measures designed to curb inflation, these policies may not be successful. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our business, financial condition and results of operations.

56. *The extent and reliability of Indian infrastructure, to the extent insufficient, could adversely impact our business, financial condition and results of operations.*

India's physical infrastructure is less developed than that of many developed nations. Any congestion or disruption with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies including our chemical products, and add costs to doing business in India. These problems could interrupt our business operations, which could have adverse effect on our business, financial condition and results of operations.

57. *Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. For further details, see "*Restrictions on Foreign Ownership of Indian Securities*" on page 233 of this Draft Red Herring Prospectus. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

58. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, financial condition and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2024 (“Finance Bill”), has introduced various amendments. The Finance Bill has received assent from the President of India on February 15, 2024, and has been enacted as the Finance Act, 2024. We cannot predict whether any amendments made pursuant to the Finance Act, 2024 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

59. *A third-party could be prevented from acquiring control of us post this issue, because of anti-takeover provisions under Indian Law.*

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI SAST Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether

individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of SEBI SAST Regulations.

60. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have in the past experienced substantial dislocations, liquidity disruptions and market corrections.

INDUSTRY OVERVIEW

The information in this chapter has been extracted from the websites of and publicly available documents from various sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with this Offer has independently verified the information provided in this chapter. GLOBAL ECONOMIC OVERVIEW

Moderating Inflation and Steady Growth Open Path to Soft Landing

- Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.
- With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and then assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.
- Policymakers' near-term challenge is to successfully manage the final descent of inflation to target, calibrating monetary policy in response to underlying inflation dynamics and—where wage and price pressures are clearly dissipating—adjusting to a less restrictive stance. At the same time, in many cases, with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation to rebuild budgetary capacity to deal with future shocks, raise revenue for new spending priorities, and curb the rise of public debt is needed. Targeted and carefully sequenced structural reforms would reinforce productivity growth and debt sustainability and accelerate convergence toward higher income levels. More efficient multilateral coordination is needed for, among other things, debt resolution, to avoid debt distress and create space for necessary investments, as well as to mitigate the effects of climate change.

Forces Shaping the Outlook

The global economic recovery from the COVID-19 pandemic, Russia's invasion of Ukraine, and the cost-of-living crisis is proving surprisingly resilient. Inflation is falling faster than expected from its 2022 peak, with a smaller-than-expected toll on employment and activity, reflecting favorable supply side developments and tightening by central banks, which has kept inflation expectations anchored. At the same time, high interest rates aimed at fighting inflation and a withdrawal of fiscal support amid high debt are expected to weigh on growth in 2024. Growth resilient in major economies. Economic growth is estimated to have been stronger than expected in the second half of 2023 in the United States, and several major emerging market and developing economies. In several cases, government and private spending contributed to the upswing, with real disposable income gains supporting consumption amid still-tight—though easing—labor markets and households drawing down on their accumulated pandemic-era savings. A supply-side expansion also took hold, with a broad-based increase in labor force participation, resolution of pandemic-era supply chain problems, and declining delivery times. The rising momentum was not felt everywhere, with notably subdued growth in the euro area, reflecting weak consumer sentiment, the lingering effects of high energy prices, and weakness in interest-rate-sensitive manufacturing and business investment.

The Forecast

Growth Outlook: Resilient but Slow

Global growth, estimated at 3.1 percent in 2023, is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025. Compared with that in the October 2023 WEO, the forecast for 2024 is about 0.2 percentage point higher, reflecting upgrades for China, the United States, and large emerging market and developing economies. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity growth. Advanced economies are expected to see growth decline slightly in 2024 before rising in 2025, with a recovery in the euro area from low growth in 2023 and a moderation of growth in the United States. Emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences. World trade growth is projected at 3.3 percent in 2024 and 3.6 percent in 2025, below its historical average growth rate of 4.9 percent. Rising trade distortions and geoeconomics fragmentation are expected to continue to weigh on the level of global trade. Countries imposed about 3,200 new restrictions on trade in 2022 and about 3,000 in 2023, up from about 1,100 in 2019, according to Global Trade Alert data.

These forecasts are based on assumptions that fuel and nonfuel commodity prices will decline in 2024 and 2025 and that interest rates will decline in major economies. Annual average oil prices are projected to fall by about 2.3 percent in 2024, whereas nonfuel commodity prices are expected to fall by 0.9 percent. IMF staff projections are for policy rates to remain at current levels for the Federal Reserve, the European Central Bank, and the Bank of England until the second half of 2024, before gradually declining as inflation moves closer to targets. The Bank of Japan is projected to maintain an overall accommodative stance. For advanced economies, growth is projected to decline slightly from 1.6 percent in 2023 to 1.5 percent in 2024 before rising to 1.8 percent in 2025. An upward revision of 0.1 percentage point for 2024 reflects stronger-than-expected US growth, partly offset by weaker-than-expected growth in the euro area.

- In the United States, growth is projected to fall from 2.5 percent in 2023 to 2.1 percent in 2024 and 1.7 percent in 2025, with the lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labor markets slowing aggregate demand. For 2024, an upward revision of 0.6 percentage point since the October 2023 WEO largely reflects statistical carryover effects from the stronger-than-expected growth outcome for 2023.
- Growth in the euro area is projected to recover from its low rate of an estimated 0.5 percent in 2023, which reflected relatively high exposure to the war in Ukraine, to 0.9 percent in 2024 and 1.7 percent in 2025. Stronger household consumption as the effects of the shock to energy.
- In Latin America and the Caribbean, growth is projected to decline from an estimated 2.5 percent in 2023 to 1.9 percent in 2024 before rising to 2.5 percent in 2025, with a downward revision for 2024 of 0.4 percentage point compared with the October 2023 WEO projection. The forecast revision for 2024 reflects negative growth in Argentina in the context of a significant policy adjustment to restore macroeconomic stability. Among other major economies in the region, there are upgrades of 0.2 percentage point for Brazil and 0.6 percentage point for Mexico, largely due to carryover effects from stronger-than-expected domestic demand and higher-than-expected growth in large trading-partner economies in 2023.

Inflation Outlook: Steady Decline to Target

Global headline inflation is expected to fall from an estimated 6.8 percent in 2023 (annual average) to 5.8 percent in 2024 and 4.4 percent in 2025. The global forecast is unrevised for 2024 compared with October 2023 projections and revised down by 0.2 percentage point for 2025. Advanced economies are expected to see faster disinflation, with inflation falling by 2.0 percentage points in 2024 to 2.6 percent, than are emerging market and developing economies, where inflation is projected to decline by just 0.3 percentage point to 8.1 percent. The forecast is revised down for both 2024 and 2025 for advanced economies, while it is revised up for 2024 for emerging market and developing economies,

mainly on account of Argentina where the realignment of relative prices and elimination of legacy price controls, past currency depreciation, and the related pass-through into prices is expected to increase inflation in the near term. The drivers of declining inflation differ by country but generally reflect lower core inflation as a result of still-tight monetary policies, a related softening in labor markets, and pass-through effects from earlier and ongoing declines in relative energy prices.

Overall, about 80 percent of the world's economies are expected to see lower annual average headline and core inflation in 2024. Among economies with an inflation target, headline inflation is projected to be 0.6 percentage point above target for the median economy by the fourth quarter of 2024, down from an estimated gap of 1.7 percentage points at the end of 2023. Most of these economies are expected to reach their targets (or target range midpoints) by 2025. In several major economies, the downward revision to the projected path of inflation, combined with a modest upgrade to economic activity, implies a softer-than-expected landing.

Risks to the Outlook

With the likelihood of a hard landing receding as adverse supply shocks unwind, risks to the global outlook is broadly balanced. There is scope for further upside surprises to global growth, although other potential factors pull the distribution of risks in the opposite direction. Upside risks. Stronger global growth than expected could arise from several sources:

- **Faster disinflation:** In the near term, the risk that inflation will fall faster than expected could again become a reality, with stronger-than-expected pass-through from lower fuel prices, further downward shifts in the ratio of vacancies to unemployed persons, and a compression of profit margins to absorb past cost increases. Combined with a decline in inflation expectations, such developments could allow central banks to move forward with their policy-easing plans and could also contribute to improving business, consumer, and financial market sentiment, as well as raising growth.
- **Slower-than-assumed withdrawal of fiscal support:** Governments in major economies might withdraw fiscal policy support more slowly than necessary and then assumed during 2024–25, implying higher-than-projected global growth in the near term. However, such delays could in some cases exacerbate inflation and, with elevated public debt, result in higher borrowing costs and a more disruptive policy adjustment, with a negative impact on global growth later on.
- **Faster economic recovery in China:** Additional property sector–related reforms—including faster restructuring of insolvent property developers while protecting home buyers’ interests—or larger than-expected fiscal support could boost consumer confidence, bolster private demand, and generate positive cross-border growth spillovers.
- **Artificial intelligence and supply-side reforms:** Over the medium term, artificial intelligence could boost workers’ productivity and incomes, although this would depend on countries’ harnessing the potential of artificial intelligence. Advanced economies may experience benefits from artificial intelligence sooner than emerging market and developing economies, largely because their employment structures are more focused on cognitive-intensive roles. ² For emerging market and developing economies with constrained policy environments, faster progress on implementing supply-enhancing reforms could result in greater-than-expected domestic and foreign investment and productivity and faster convergence to higher income levels.

Downside risks. Several adverse risks to global growth remain plausible:

Commodity price spikes amid geopolitical and weather shocks: The conflict in Gaza and Israel could escalate further into the wider region, which produces about 35 percent of the world’s oil exports and 14 percent of its gas exports. Continued attacks in the Red Sea—through which 11 percent of global trade flows—and the ongoing war in Ukraine risk generating fresh adverse supply shocks to the global recovery, with spikes in food, energy, and transportation costs. Container shipping costs have already sharply increased, and the situation in the Middle East remains volatile. Further geoeconomics fragmentation could also constrain the cross-border flow of commodities, causing additional price volatility. More extreme weather shocks, including floods and drought, could, together with the El Niño phenomenon, also cause food price spikes, exacerbate food insecurity, and jeopardize the global disinflation process.

Policy Priorities

As inflation declines toward target levels across regions, the near-term priority for central banks is to deliver a smooth landing, neither lowering rates prematurely nor delaying such lowering too much. With inflation drivers and dynamics differing across economies, policy needs for ensuring price stability are increasingly differentiated. At the same time, in many cases, amid rising debt and limited budgetary room to maneuver, and with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation is needed. Intensifying supply enhancing reforms would facilitate both inflation and debt reduction and enable a durable rise in living standards.

Managing the final descent of inflation.

The faster-than-expected fall in inflation is allowing an increasing number of central banks to move from raising policy rates to adjusting to a less restrictive stance. In this context, ensuring that wage and price pressures are clearly dissipating and avoiding the appearance of prematurely “declaring victory” will guard against later having to backpedal in the event of upside surprises to inflation. At the same time, where measures of underlying inflation and expectations are clearly moving toward target-consistent levels, adjusting rates to more neutral levels—while signaling continued commitment to price stability—may be necessary (considering long transmission lags) to avoid protracted economic

weakness and target undershoots. In some emerging market economies, in which the monetary tightening cycle paved the way for earlier rate reductions, continuing to calibrate the pace of monetary adjustments based on a broad array of wage and price pressure gauges is appropriate. With borrowing costs still high, careful monitoring of financing conditions and readiness to deploy financial stability tools will remain vital for avoiding financial sector strains.

prepandemic levels and higher debt-service costs, fiscal consolidation based on credible medium-term plans, with the pace of adjustment depending upon country-specific circumstances, is warranted to restore room for budgetary maneuver. Increasing fiscal balances over a sustained period, while protecting priority investments and support to the vulnerable, is needed in many cases. Well-calibrated plans can support fiscal policy credibility, allow the pace of consolidation to be adjusted as a function of the strength of private demand, and avert disruptive front-loaded adjustments. Mobilizing domestic revenue, addressing spending rigidities, and reinforcing institutional fiscal frameworks are likely to support adjustment efforts, both in economies with sizable spending needs and in others as well. For countries in or at high risk of debt distress, orderly debt restructuring may also be necessary. Faster and more efficient coordination on debt resolution, through the Group of Twenty Common Framework and the Global Sovereign Debt Roundtable, would help mitigate the risk of debt distress spreading.

Enabling durable medium-term growth.

Targeted and carefully sequenced structural reforms can reinforce productivity growth and reverse declining medium-term growth prospects despite constrained policy space. Bundling reforms that alleviate the most binding constraints to economic activity can front-load the resulting output gains, even in the short term, and secure public buy-in. 3 Industrial policies can be pursued where clearly identifiable externalities or important market failures are well established and other more effective policy options are unavailable, but the policies need to be consistent with World Trade Organization (WTO) rules. Such policies are more likely to be successful if complemented with appropriate economy-wide reforms and good governance frameworks. Carbon pricing, subsidies for green investments, reducing energy subsidies, and carbon border-adjustment mechanisms can speed the green transition but must be designed to support consistency with WTO rules. Investments in climate adaptation activities and infrastructure are also needed to support resilience.

Strengthening resilience through multilateral cooperation.

Intensified cooperation in areas of common interest is vital for mitigating the costs of the separation of the world economy into blocs. In addition to coordination on debt resolution, cooperation is required to mitigate the effects of climate change and facilitate the green energy transition, building on recent agreements at the 2023 Conference of the Parties to the UN Framework Convention on Climate Change (COP28). Safeguarding the transportation of critical minerals, restoring the WTO's ability to settle trade disputes, and ensuring the responsible use of potentially disruptive new technologies such as artificial intelligence by, among other things, upgrading domestic regulatory frameworks and harmonizing global principles are further priorities. The IMF Board of Governors' conclusion of the 16th Review of Quotas is a welcome step that needs now to be followed by members' providing their consent to their respective quota increases.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices in the second quarter of 2022–23 is estimated at US\$ 1.94 trillion (Rs. 160.06 trillion), showing a growth of 7.2% as compared to the First Revised Estimates of GDP for the year 2021–22 of US\$ 1.81 trillion (Rs. 149.26 trillion), indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In FY22, India's service exports stood at US\$ 254.4 billion. Furthermore, India's overall exports (services and merchandise) was estimated at US\$ 770.18 billion in FY23. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking

up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback. India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at US\$ 3.31 trillion (Rs. 272.41 trillion) in FY22. Additionally, the Nominal GDP at current prices in Q3 of 2022-23 was US\$ 874.84 billion (Rs. 71.82 trillion), as against US\$ 792.3 billion (Rs. 65.05 trillion) in 2021-22, estimating a growth of 10.4%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at US\$ 1.3 billion, 0.2% of GDP in the fourth quarter of FY23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of January 6, 2023, India's foreign exchange reserves stood at US\$ 561,583 million.

- Merchandise exports in March 2023 stood at US\$ 38.38 billion, with total merchandise export of US\$ 447.46 billion during the period of April-March 2023. The overall exports (merchandise and service exports) in 2022-23 was estimated at US\$ 770.18, exhibiting a positive growth of 13.84%.

- In FY23, the Foreign Portfolio Investment (FPI) outflows stood at US\$ 14.81 billion (Rs. 1.21 trillion). As per depository data, Foreign Portfolio Investors (FPIs) invested Rs. 22,000 crore (US\$ 2.67 billion) in India during the first week of July 2023.
- The wheat procurement during RMS 2022-23 was estimated to be 262 lakh metric tonnes and the rice procured in KMS 2022-23 was 624.18 lakh metric tonnes (518 LMT for Kharif crop and 106.18 LMT for Rabi crop). Moreover, in the budget 2022-23, direct payment of (Maximum Selling Price) MSP was launched that estimated to be US\$ 31.74 billion (Rs. 2.37 trillion) in order to boost farmers' income.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. POST-PRODUCTION PROCESS

A. Commercial Advertisement

Client Acquisition: At Picturepost Studios we acquire clients through various channels, including personal contacts, referrals, networking, online presence, and social media marketing and traditional marketing. Clients approach us with their projects which can range from feature films and web series to commercials and corporate videos.

Project Consultation: Once a client approaches us, a project consultation takes place through the marketing team. During this phase, the client discusses their vision, goals, timeline and budget with the team. We assess the project's requirements and feasibility, providing recommendations and estimates accordingly.

Pre-Production Planning: After the initial consultation, the marketing team and the client collaborate on pre-production planning. This involves defining the project scope, creating a production timeline, assembling a team of professionals (online and offline editors, VFX artists, colorist etc.), and securing necessary resources such as rooms allotment, equipment and software licenses.

Data Entry: A dedicated team obtains the data and takes the same on drive and makes the entry of complete details of the client and the project and further the conversion of the footage is done if required.

Editing and Assembly: Post data entry and conversion, our editing process begins with ingesting the raw footage into the editing system. The offline editor works closely with the client to assemble the footage according to the script or storyboard, refining the storyline, pacing and overall flow of the project. This phase may involve multiple rounds of revisions based on client feedback.

Color Correction and Grading: Color correction and grading are crucial steps in achieving a cohesive and visually appealing look for the final product. Colorists adjust the color balance, contrast, saturation and exposure of each shot to enhance its aesthetic appeal and maintain consistency throughout the project.

Visual Effects (VFX) and Graphics: Our VFX artists and designers create and integrate these elements seamlessly into the footage. This could involve compositing, CGI (Computer-Generated Imagery), green screen keying, motion graphics and title sequences.

Online Editing: Further-more, once the footage is approved, the Flame (Online) Artist work on enhancing the video. This includes detailed corrections in terms of the quality of the video.

CAPACITY AND CAPACITY UTILISATION

As we are involved in post-production activities, we do not have any capacity utilisation data as such. Our activities are dependent on our project execution activities.

PRICING

Our pricing typically depends on factors like complexity, duration, and client requirements. We usually provide quotes based on these factors, ensuring transparency and fairness. Our goal is to offer competitive rates while delivering exceptional quality and meeting client expectations.

PROJECT SUPERVISION AND QUALITY CONTROL

From start to end of the projects, strict measures are put in place to emphasis on quality and maintenance of secrecy of the projects and its contents. From the start till completion of projects, we have a team of highly trained technical and Management professionals to ensure that each project is delivered on time with benchmark exceptional standards. In order to ensure that such policies, standards and checks are complied with, VFX supervisors are in charge of the whole VFX project. They manage the VFX pipeline, including all of the VFX artists that work in this process. They have ultimate responsibility for all of the VFX elements produced for a project by their company or studio. They are present for filming during production so that they can see if the shots are satisfactory and ready for the VFX elements. VFX studios prefer if shots (pictures) are 'locked' (edited and okayed, ready to have VFX elements added to it) during filming. That means they can start working on the VFX, while the rest of the film is being shot. They continue to lead their team when the film is being put together during post-production. They oversee the quality of all work produced and make sure that it is in line with the vision of the director or producer.

We are a Trusted Partner Network ("TPN") certified VFX provider. TPN, owned and managed by the Motion Picture Association (MPA) in USA, is a global, industry-wide film and television content protection initiative. The TPN helps companies prevent leaks, breaches, and hacks of their customers' movies and television shows prior to their intended release and seeks to raise security awareness, preparedness, and capabilities within the industry. Partners who pass an independent assessment conforming to these industry best practices are listed as "trusted partners" in the TPN directory.

This classification has been identified and reclassified accordingly. The unbilled Revenue, which was previously included under inventory, has been reclassified and correctly booked as Unbilled Revenue under current assets.

Inventories are valued at the lower of cost and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost is generally determined on weighted average basis except for inventory segregated for a specific order / project, in which case it is valued at their specific costs of purchase. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges.

Defined contribution plans

The Company's contribution to provident fund is considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined benefit plans

For defined benefit plans in the form of gratuity (unfunded), the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost.

i) Taxation

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

j) Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

k) Borrowing costs

Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan.

l) Earnings per Share

Basic earnings per share is computed by dividing the profit/(loss) after tax (including the post tax effect of extra ordinary items, if any) by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed using the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares, if any.

Hence EPS and NAV per share for all the year of reporting period have been calculated by considering the number of shares outstanding post conversion of Partnership Firm into the Company (i.e 2,25,00,000 Equity Shares of Rs.1 each)

m) Impairment of assets

The carrying values of assets/ cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

n) Operating Cycle:

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current. As a result, current assets comprise elements that are expected to be realised within 12 months after the reporting date and current liabilities comprise elements that are due for settlement within 12 months after the reporting date.

o) Details of Share Capital

The Company was incorporated by conversion of erstwhile Partnership Firm, hence the partners of the firm become subscriber of the Company. Silvercloud Studios Pvt. Ltd.; 2. Anshoo Shashidhar Pathak; 3. Suzanna Mukherjee; 4. Kunal Kuwadekar; 5. Amit Jain (Parties 1 to 5 hereinafter individually referred to as respondent no. 1, 2, 3, 4, 5 & 6 respectively and jointly as Respondents)

(Original Arbitration Petition bearing CNR Number HCBM20165712022 filed and pending with High Court of Bombay)

The petitioners herein are the shareholders of the Company which is respondent no. 1 & and alleged Respondent No. 2 & 3 for having been attempting to take away entire company and assets without satisfying its liability without final order of the Arbitral Proceeding. Accordingly, the instant petition has been filed seeking the grant of urgent interim and ad interim reliefs for the protection of the assets of the Respondent No. 1 Company, pending the hearing and conclusion of arbitral proceedings between the parties. The dispute between the parties has arisen under the terms of share purchase agreement dated February 02, 2022.

The petitioners herein claim to be the shareholders of to the extent of 71.63% i.e. 50,50,000 shares in the Respondent no. 1 Company. Respondent No. 4 & 5 were also the shareholders of the Company to the extent of 28.27%.

Later the petitioner No. 1 & 2 with an intent to meet their financial requirements, decided to sell their entire shareholding and accordingly claims to have entered into a share purchase agreement dated February 02, 2022 along with Respondent No. 4 & 5 wherein Respondent No. 2 & 3 were prospective purchasers and the entire shareholding was agreed to be purchased at Rs. 1.20 per share and purchase consideration to be transferred to the account of sellers, by May 02, 2022 and the management of the Company was accordingly transferred to the Respondent No. 2 & 3. However as alleged, the Respondent No. 2 & 3 failed to pay the purchase consideration (being Rs. 60,60,000/-) to the account of the sellers by the agreed date and latest by the extended date i.e. May 10, 2022 owing to which, the share purchase agreement allegedly stood determined by operation of the determination clause of the agreement.

Aggrieved by the aforementioned situation of not having received the share consideration, despite of transferring the management to the Respondent No. 2 & 3, the Petitioners herein claims to foresee threat to the assets of the Company and oppression and mismanagement of its funds, claims to have served a Special notice for the removal of the Respondent No. 2 & 3 from the management of the Company and for calling an extra Ordinary General Meeting (EGM) for the appointment of Petitioner no. 1 & 2 on the board of the Company which was allegedly refused to be accepted by the respondent No. 1 herein. Aggrieved by the same, the instant ad-interim petition was filed under Section 11 of the Arbitration and Reconciliation Act, praying for maintenance of the status quo of the Respondent No. 1 Company and for making directions for calling EGM for reinstatement of the Petitioner No. 1 & 2 (being the majority shareholders) on the Board as the terms of the Share Purchase Agreement stood determined for non adherence to the payment terms and timelines as per the agreement.

The matter is pending before the concerned court of jurisdiction.

As claimed further, the plot no. of the said land was C.S. No. 3148 which was mistakenly mentioned as 2148 in the land registry made with concerned authority. Further as alleged, taking advantage of this clerical mistake, the defendant 1st Party constructed a building over the suit land between November 15, 2020 to December 10, 2022 (period during which the plaintiff herein claimingly could not visit the land for its inspection), thereby dispossessing the plaintiffs from the Suit land. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. For further details, refer to the General Information Document available on the website of the Stock Exchange and the Book Running Lead Manager.

Phase II: This phase has become applicable from July 1, 2019. and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. 24. (i) Any person becoming entitled to a share in consequence of the death or insolvency of a member may, upon such evidence being produced as may from time to time properly be required by the Board and subject as hereinafter provided, elect, either—

- (a) to be registered himself as holder of the share; or
- (b) to make such transfer of the share as the deceased or insolvent member could have made.

(ii) The Board shall, in either case, have the same right to decline or suspend registration as it would have had, if the deceased or insolvent member had transferred the share before his death or insolvency.

25. (i) If the person so becoming entitled shall elect to be registered as holder of the share himself, he shall deliver or send to the Company a notice in writing signed by him stating that he so elects.

(ii) If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share.

(iii) All the limitations, restrictions and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as aforesaid as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.

26. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the Company:

Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have been complied with.

Forfeiture of shares

27. If a member fails to pay any call, or installment of a call, on the day appointed for payment thereof, the Board may, at any time thereafter during such time as any part of the call or installment remains unpaid, serve a notice on him requiring payment of so much of the call or installment as is unpaid, together with any interest which may have accrued.

28. The notice aforesaid shall—

(a) name a further day (not being earlier than the expiry of fourteen days from the date of service of the notice) on or before which the payment required by the notice is to be made; and

(b) state that, in the event of non-payment on or before the day so named, the shares in respect of which the call was made shall be liable to be forfeited.

29. If the requirements of any such notice as aforesaid are not complied with, any share in respect of which the notice has been given may, at any time thereafter, before the payment required by the notice has been made, be forfeited by a resolution of the Board to that effect

30. (i) A forfeited share may be sold or otherwise disposed of on such terms and in such manner as the Board thinks fit.

(ii) At any time before a sale or disposal as aforesaid, the Board may cancel the forfeiture on such terms as it thinks fit.

31. (i) A person whose shares have been forfeited shall cease to be a member in respect of the forfeited shares, but shall, notwithstanding the forfeiture, remain liable to pay to the Company all monies which, at the date of forfeiture, were presently payable by him to the Company in respect of the shares.

(ii) The liability of such person shall cease if and when the Company shall have received payment in full of all such monies in respect of the shares.

32(i) A duly verified declaration in writing that the declarant is a director, the manager or the secretary, of the Company, and that a share in the Company has been duly forfeited on a date stated in the declaration, shall be conclusive evidence of the facts therein stated as against all persons claiming to be entitled to the share;

(ii) The Company may receive the consideration, if any, given for the share on any sale or disposal thereof and may execute a transfer of the share in favour of the person to whom the share is sold or disposed of;

(iii) The transferee shall thereupon be registered as the holder of the share; and

(iv) The transferee shall not be bound to see to the application of the purchase money, if any, nor shall his title to the share be affected by any irregularity or invalidity in the proceedings in reference to the forfeiture, sale or disposal of the share.

33. The provisions of these regulations as to forfeiture shall apply in the case of nonpayment of any sum which, by the terms of issue of a share, becomes payable at a fixed time, whether on account of the nominal value of the share or by way of premium, as if the same had been payable by virtue of a call duly made and notified.

Provided that the Board may, from time to time, fix the minimum amount of stock transferable, so, however, that such minimum shall not exceed the nominal amount of the shares from which the stock arose.

(b) the holders of stock shall, according to the amount of stock held by them, have the same rights, privileges and advantages as regards dividends, voting at meetings of the Company, and other matters, as if they held the shares from which the stock arose; but no such privilege or advantage (except participation in the dividends and profits of the Company and in the assets on winding up) shall be conferred by an amount of stock which would not, if existing in shares, have conferred that privilege or advantage.

(c) such of the regulations of the Company as are applicable to paid-up shares shall apply to stock and the words “share” and “shareholder” in those regulations shall include “stock” and “stock-holder” respectively.

37. The Company may, by special resolution, reduce in any manner and with, and subject to, any incident authorised and consent required by law,—
